PUBLISHED IN MAY NINETEEN HUNDRED AND
FOUR FOR THE MDCCCCV JUNIOR CLASS
AT BANGOR BY CHARLES H. GLASS & CO.

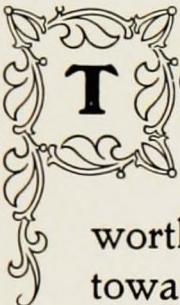

DEDICATED

To the

HON. GEORGE EDWARD THOMPSON

In recognition of his devotion to his Alma
Mater and in appreciation of his generous
efforts as a defender of her rights.....

FOREWORD

 **T**O all those who love the name and fame of Mother Maine, to all those who are interested in her welfare, sympathize with her, and recognize her sterling worth,—we present this book as the best of our efforts towards the portrayal of a chapter of her history. Some radical departures have been made from the PRISMS of former years, we trust for the betterment of the book. It has been our aim to eliminate whatever was cumbersome or unnecessary and to boil down and condense the subject matter. We have attempted to picture men and things in their true light, and if we have failed in this we ask you to remember that no mortal is infallible, to pardon our mistakes and overlook our shortcomings.

Some of you have been “knocked.” You will get over it. Remember that trite sentence, “Laugh and the world laughs with you,” and try a smile just for an experiment.

We wish to take this opportunity of expressing our thanks to all who have in any way assisted in the publication of this volume.

ALUMNI ASSOCIATIONS

The General Association

President, LOUIS C. SOUTHARD, 73 Tremont St., Boston.
Recording Secretary, ORA W. KNIGHT, 84 Forest Ave., Bangor.
Corresponding Secretary, RALPH K. JONES, Orono.
Treasurer, ALBERT H. BROWN, Oldtown.
Necrologist, JAMES N. HART, Orono.

The West Maine Association

President, R. W. EATON, Brunswick.
Secretary and Treasurer, A. C. WESTCOTT, 7 Exchange St., Portland.

The North Maine Association

President, HARVEY B. THAYER, Presque Isle.
Secretary, N. H. MARTIN, Fort Fairfield.

The Boston Association

President, HEYWOOD S. FRENCH, 683 Atlantic Ave.
Secretary, J. W. OWEN, 101 Milk St.

The New York Association

President, C. H. NEALLEY, 111 West 68th St.
Secretary, CHARLES CUSHMAN, 30 Broad St.

The Washington (D. C.) Association

President, F. LAMSON-SCRIBNER, Dept. of Agriculture.
Secretary, GEORGE P. MERRILL, National Museum.

The Penobscot Valley Association

President, E. H. KELLEY, Bangor.
Secretary, C. A. DILLINGHAM, Bangor.

The Western Association

President, OLIVER C. FARRINGTON, Field Columbian Museum, Chicago, Ill.
Secretary, RAY H. MANSON, Kellogg Switchboard and Supply Co., Chicago, Ill.

FALL TERM, 1903

- SEPTEMBER 14, MONDAY Arrearage Examinations Begin.
SEPTEMBER 15, TUESDAY Entrance Examinations Begin.
SEPTEMBER 17, THURSDAY Fall Term Begins.
NOVEMBER 24, TUESDAY Meeting of the Board of Trustees.
NOVEMBER 25, WEDNESDAY Thanksgiving Recess Begins 12 M.
DECEMBER 1, TUESDAY Thanksgiving Recess Ends, 7.45 A. M.
DECEMBER 4, FRIDAY Sophomore Prize Declamations.

CHARLES DAYTON WOODS	<i>Director of the Experiment Station</i>
OLA HELEN PERRIN	<i>Stenographer</i>
GRACE MAY COLBURN	<i>Cashier</i>

OTHER OFFICERS

RALPH KNEELAND JONES	<i>Librarian</i>
GENEVA RING HAMILTON	<i>Assistant Librarian</i>
ARCHER LEWIS GROVER	<i>Physical Director</i>

THE College of Liberal Arts comprises the Classical, Latin-Scientific, and Scientific Courses, planned and designed to accommodate those who wish broad general culture or an opportunity to specialize in mathematics, literature, philosophy, or the sciences. Much of the work of this college is required of students taking their major subject in the other colleges. In the Classical Course the student is required to take Greek and Latin during his freshman year. After the freshman year he may select his major subject from any of the courses offered to undergraduates at the University. The Latin-Scientific Course is like the Classical except that Greek is not required. The Scientific Course omits both Greek and Latin and gives special attention to mathematics, science and the modern languages.

The degree of Bachelor of Arts is given to graduates in the Classical Course, that of Bachelor of Philosophy to those in the Latin-Scientific Course, and that of Bachelor of Science to those in the Scientific Course.

FACULTY

GEORGE EMORY FELLOWS, Ph. D., L. H. D., LL. D.
President and Professor of History.

Lawrence University, B. A., 1879; M. A., 1882; Munich and Berne, 1888-90; Berne, Ph. D., 1890; Lawrence, L. H. D., 1902; Bowdoin, LL. D., 1902; Author of "Outline Study of the Sixteenth Century," Chicago, 1895; "Recent European History," Boston, 1902; $\Phi K \Phi$.

JAMES NORRIS HART, C. E., M. S.
Dean and Professor of Mathematics and Astronomy.

University of Maine, B. C. E., 1885; C. E., 1890; University of Chicago, M. S., 1897; $\Phi K \Phi$, $\Phi \Gamma \Delta$.

MERRITT CALDWELL FERNALD, M. A., Ph. D., LL. D.
Emeritus Professor of Philosophy.

Bowdoin College, B. A., 1861; M. A., 1864; Ph. D., 1881; LL. D., 1902; Harvard, 1863-64; President University of Maine, 1879-93; $\Phi B K$, $\Phi K \Phi$, $\Theta \Delta X$.

ALFRED BELLAMY AUBERT, M. S.
Professor of Chemistry.

Cornell University, B. S., 1873; University of Maine, M. S.; $\Phi K \Phi$.

ALLEN ELLINGTON ROGERS, A. M.
Professor of Civics and Constitutional Law.

Bowdoin College, B. A., 1876; M. A., 1880; Medical School of Maine, 1878; author of "Our System of Government"; $\Phi K \Phi$, $\Theta \Delta X$.

LUCIUS HERBERT MERRILL, B. S.
Professor of Biological Chemistry and Chemist in Experiment Station.

University of Maine, B. S., 1883; $\Phi K \Phi$, $\Phi \Gamma \Delta$.

FREMONT LINCOLN RUSSELL, B. S., V. S.

Professor of Biology and Veterinarian of the Experiment Station.

University of Maine, B. S., 1885; New York College of Veterinary Surgeons, V. S., 1886; graduate work at Johns Hopkins University, 1888-89; $\Phi K \Phi$, $\Phi \Gamma \Delta$.

WELTON MARKS MUNSON, M. S., Ph. D.

Professor of Horticulture and Horticulturist at Experiment Station.

Michigan Agricultural College, B. S., 1888; M. S., 1892; Cornell, Ph. D., 1901; $\Sigma \Xi$, $\Phi K \Phi$, $\Phi \Delta \Theta$.

HORACE MELVYN ESTABROOKE, M. S., M. A.

Professor of English.

University of Maine, B. S., 1876; M. S., 1884; Bowdoin College, M. A., 1891; $\Phi K \Phi$, $\Phi \Gamma \Delta$.

JAMES STACY STEVENS, M. S., Ph. D.

Professor of Physics.

University of Rochester, B. S., 1885; M. S., 1888; University of Syracuse, M. S., 1889; Ph. D., 1890; University of Chicago, 1895-96; Massachusetts Institute of Technology; author of "Outlines of General Physics;" "Outlines of Laboratory Physics"; $\Phi B K$, $\Phi K \Phi$, ΔKE .

KARL POMEROY HARRINGTON, M. A.

Professor of Latin.

Wesleyan University, B. A., 1882; M. A., 1885; University of Berlin, 1888-89; Yale University, 1890-91; Editor of "Helps to the Intelligent Study of College Preparatory Latin"; "Greek and Roman Mythology" (with H. C. Tolman); $\Phi B K$, $\Phi K \Phi$, ΨT .

JOHN HOMER HUDDILSTON, M. A., Ph. D.

Professor of Greek.

Baldwin University, B. A., 1890; M. A., 1892; Harvard, B. A., 1893; Munich, Ph. D. (Magno cum Laude), 1897; author of "Essentials of New Testament Greek," 1895; "Key" to same, 1898; "Attitude of Greek Tragedians toward Art," 1898; "Greek Tragedy in the Light of Vase Painting," 1898; German edition of same translated by Professor Heuse, Freiburg, 1900; "Lessons from Greek Pottery," 1901; $\Phi K \Phi$, ΣX .

GILMAN ARTHUR DREW, Ph. D.

Professor of Biology.

University of Iowa, B. S., 1890; Johns Hopkins University, Ph. D., 1898.

ORLANDO FAULKLAND LEWIS, M. A., Ph. D.

Professor of German.

Tufts College, B. A., 1895; M. A., 1897; Pennsylvania, Ph. D., 1900; Munich, 1897-98; Paris, 1900; Author of "Alternative English-German Exercises"; Editor of "Germelshausen," "Doktor Wespe"; $\Phi B K$, $\Phi K \Phi$, $\Sigma \Psi$.

JACOB BERNARD SEGALL, Ph. D.

Professor of Romance Languages.

University of Iassy, B. A., 1884; Columbia University, Ph. D., 1893; Polytechnikum of Zürich, 1887-89; University of Munich, 1889-90; University of Paris, 1896-97.

CAROLINE COLVIN, Ph. D.

Assistant Professor in History.

Indiana University, B. A., 1893; Fellow in European History, University of Pennsylvania, 1898-1901; University of Pennsylvania, Ph. D., 1901; research work in Ireland and Scotland, 1901-02.

GUY ANDREW THOMPSON, M. A.

Instructor in English.

University of Illinois, B. A., 1898; Harvard University, B. A., 1900; M. A., 1901; $\Phi K \Phi$, $\Phi \Gamma \Delta$.

JOHN EMERSON BURBANK, M. A.

Instructor in Physics.

Bowdoin College, B. A., 1896; M. A., 1897; Harvard University, M. A., 1897; $\Phi B K$, $\Delta \Gamma$.

THOMAS BUCK, B. S.

Instructor in Mathematics.

University of Maine, B. S., 1901; University of Chicago, 1901-1902; $\Phi K \Phi$, $\Phi K \Sigma$.

WALTER DAVIS LAMBERT, M. A.

Instructor in Mathematics.

Harvard University, B. A., 1900; M. A. 1901; $\Phi B K$, $\Phi K \Phi$.

HENRY MARTIN SHUTE, M. A.

Instructor in Modern Languages.

Tufts College, B. A., 1902; M. A., 1902; ΔT .

MARSHALL BAXTER CUMMINGS, B. S.

Assistant in Horticulture and Instructor in Botany.

University of Vermont, B. S., 1901.

GRANT TRAIN DAVIS, B. A.

Instructor in Chemistry.

University of Michigan, B. A., 1903.

RALPH MELVIN CONNOR, B. S.

Tutor in Mathematics.

University of Maine, B. S., 1903; $\Phi K \Phi$, $\Sigma A E$.

EVERETT HARLOW BOWEN, B. A.

Tutor in Physics.

Colgate University, B. A., 1903; $\Phi B K$, $B \Theta \Pi$.

JOHN BYRON REED, B. A.

Instructor in Chemistry.

University of Michigan, B. A., 1903.

NEWALL WALTER EDSON, B. A.

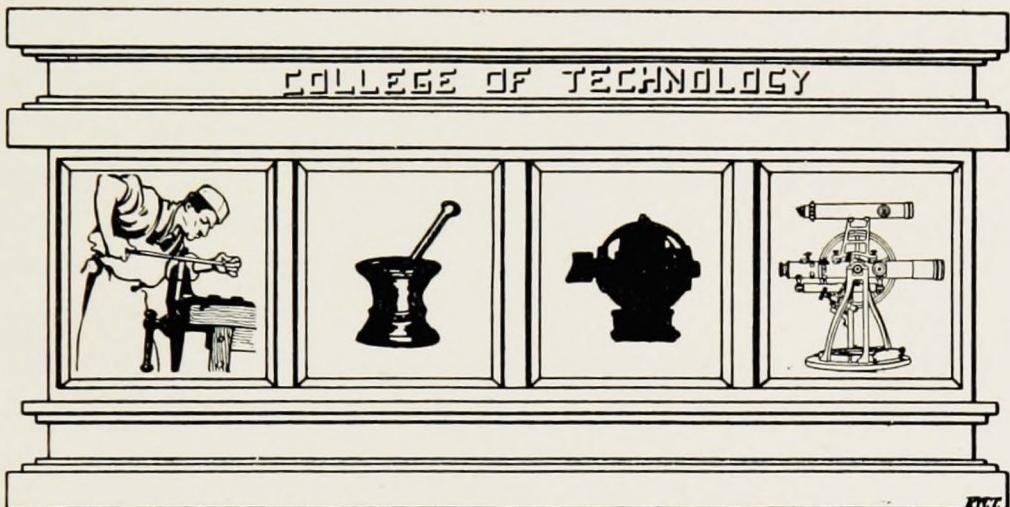

Instructor in English.

Harvard University, B. A., 1903.

HENRY MELVILLE SOPER, B. S.

Assistant in Chemistry.

University of Maine, B. S., 1903; $\Phi \Gamma \Delta$.

THIS College provides technical instruction in chemistry and the various branches of engineering, the following courses being offered: Civil, Mechanical, Electrical and Mining engineering, and Chemistry. Students taking their major in any of these courses are required also to take considerable culture work in the other departments of the University, especially in the line of mathematics and the modern languages. Thirty credits, the equivalent of about twenty hours of classroom work a week for four years, are required for graduation. The work of the Freshman year is the same for all engineering students, and thus a man has a year after entering college in which to decide upon his course. At the beginning of the Sophomore year he starts on the course chosen.

The course in Chemistry is offered to those who wish to specialize in chemistry without neglecting the studies of a more general character. The

laboratory work includes a full year's work in Qualitative Analysis and two years of Quantitative Analysis, during which the student beginning with a few simple determinations, passes from these to the analysis of alloys, minerals, fertilizers and agricultural and technical products. Industrial Chemistry is made the principal study of the Senior year.

The Civil Engineering course aims to so fit a man that on graduation he may apply himself to practical engineering work. A feature of the course is the large amount of practice which the student gets in connection with the theory, especially in surveying and railroad work. The principal study of the technical work of the Senior year is the Theory of Framed Structures, which in connection with a study of masonry construction, designing several types of bridges, and thesis work, continues throughout the year.

The Mechanical Engineering course is designed to give a broad general training in the principles which underlie the application of mechanical energy to the useful arts. It is not planned to be a special preparation in any particular line of work, but students who have preferences in any special lines may adapt their undergraduate work to those ends. The course aims to develop systematic methods of work, and to give an exact knowledge of certain basic principles in mechanisms and the generation and transformation of energy. Opportunity for specializing in Marine engineering is given in the Senior year.

The Electrical Engineering course is intended to give instruction in the scientific principles of practical electrical work; 'to explain and illustrate the application of these principles to the design, construction, installation and running of apparatus with which the electrical engineer has to deal, and to give practice and experience in the running of the same.' This department is well equipped with nearly all the standard instruments and machines. The new Lord Hall will be used by the departments of Mechanical and Electrical engineering and will afford excellent facilities for laboratory work, testing, shop work and the like.

The degree of Bachelor of Science is awarded to graduates of the College of Technology.

FACULTY

GEORGE EMORY FELLOWS, Ph. D., L. H. D., LL. D.

President of the University.

Lawrence University, B. A., 1879; M. A., 1882; Munich and Berne, 1888-90; Berne, Ph. D., 1890; Lawrence, L. H. D., 1902; Bowdoin, LL. D., 1902; $\Phi K \Phi$.

Instructor in Qualitative Chemistry.

University of Michigan, B. A., 1903.

EVERETT WILLARD DAVEE,

Assistant in Shop Work.

THE College of Agriculture, comprising courses in Agriculture, Horticulture, Forestry, Animal Industry, Agricultural and Biological Chemistry, and Veterinary Science, offers a broad field of research and study along the above-named lines. The courses are designed to give training to those who wish to become farmers, teachers or investigators of agricultural subjects. Four regular college courses are given,—the Agricultural Course of four years; the Horticultural Course, the required work of which is nearly the same as that of the Agricultural Course; the Forestry Course, which gives a training in practical forestry as well as a liberal education; and the Special Course in Horticulture, for those who cannot afford to spend four years in preparing themselves to become farmers. Besides these there are the Extension Courses,—a series of short courses and a correspondence course, designed to give as much practical knowledge as possible along the line of scientific farming to those who have not the time for regular High School and College training.

The aim is to familiarize the student with modern scientific methods of farming, to teach agriculture both from a technical and a practical standpoint, and in all its branches. The college is reaching many people through its short courses and extension work, is becoming more and more each year, an important factor in the agriculture of the state, and is exerting an influence toward the economic development of the two principal resources of the state, the farm and the forest. To graduates of the regular college courses the degree of Bachelor of Science is given.

THE College of Pharmacy offers two courses designed to give practical knowledge to those who intend to become pharmacists. These are: The Pharmacy Course, which is a regular four year course; and the Short Course in Pharmacy, a two year course. The Pharmacy Course gives a broad general education, with the technical subjects which pertain to pharmaceutical work taken as a major. The Short Course eliminates the general work of the longer course, and the student is confined to those branches which directly concern the work of the pharmacist. No electives are allowed in this course except to advanced students.

It is always advisable to take the four years course when possible. There is much general knowledge that is of value to any man, regardless of his business or profession. The Short Course gives a good technical training, but must of necessity, confine the student to pharmacy and pharmacy alone.

The degree of Bachelor of Philosophy is given to graduates of the Pharmacy Course. To those in the Short Course in Pharmacy, the degree of Pharmaceutical Chemist is awarded.

"No man can instruct others in anything; we can, however, awaken thought and arouse impulses. And this is all there is of teaching—to supply an atmosphere in which thought can germinate and grow."—*The Philistine.*

COLLEGE

School of Law

"Are you in earnest? Seize this very minute;
What you can do, or dream you can, begin it;
Only engage, and then the mind grows heated;
Being, and then the work will be completed."

IN the year of our Lord 1898—and for the doing of good every year is the year of our Lord—a small number of earnest and noble men gathered in the office of General Charles Hamlin at Bangor to consider the advisability of starting a law school in connection with the University of Maine. Not self-seeking, not self-advertising, inspired their counsels. One question only was before their minds: Can a law school be started and properly maintained by the people of the State of Maine? As wise men they considered not merely what was desirable but also what was feasible. Theirs was the attitude of the practical idealist: a careful, patient, and persistent watching for opportunities, and a cheerful but determined acceptance of the day of small things in the firm belief that faithfulness in the discharge of present duties is ever rewarded by a wider usefulness in the future in connection with larger and grander opportunities.

The plan was found feasible. It was therefore to be made a fact, a reality. As Americans these men could not, and would not, command or dictate to their fellow-countrymen, but they could try, and would try, to persuade and convince them as equals and brothers, as sons of a common State and as citizens of a great and enlightened Republic. Thus it devolved upon the President of the Board of Trustees, Hon. Henry Lord, and upon the President of the University, Dr. A. W. Harris, both men identified with the movement from the start and both thoroughly convinced of its wisdom, to take the first official steps in this matter, and to show to

the Board of Trustees and to the people of the State that Maine was able, financially and otherwise, to instruct her children in her Laws and Statutes, and that therefore there should no longer exist for them any necessity, real or apparent, for seeking such knowledge elsewhere and beyond the borders of their own beloved native State. To present the proposition was to win for it the assent of the people, and thus, a little more than five years ago, there was established The University of Maine School of Law.

This was five short years ago, and now, at the beginning of the present school year, there is at the Law School an enrollment of seventy-one students as against sixty-one last year, and as against forty-two two years ago. Of the sixteen counties of the State only two are not at present represented in the school as against four last year, and as against seven two years ago. Of states outside of Maine, Massachusetts, New York, Vermont, New Hampshire, and Porto Rico have been represented in the order named.

While a law school can not guarantee the success of its graduates either at the Bar examinations or in life, it is gratifying to know that of the graduating class of 1903 all that took the Bar examinations at Portland and Boston in July, and at Bangor in February, passed without a single exception, and some with conspicuous success, a result especially satisfactory in Massachusetts where nearly forty per cent of the applicants for admission to the Bar failed to pass the prescribed examination.

All the Maine colleges, Bates, Bowdoin, Colby, and Maine University, have sent an ever increasing number of students, while of colleges and universities outside of the State, Brown, Dartmouth, Harvard, New York University, and St. Mary's College have representatives in the Law School.

The percentage of college graduates in a law school is often treated as a test of its character and quality. Two years ago the proportion of college graduates to other students in the Law School was nine per cent, last year fifteen per cent, and this year twenty-four per cent. Starting from the figures published by the Committee on Legal Education and Admissions to the Bar appointed by the American Bar Association, and taking the hundred and four law schools of the entire country, the percentage of

college graduates is twenty, that of the thirty-seven law schools belonging to the Association of American Law Schools twenty-two, that of the sixty-seven law schools outside of that association sixteen, and, omitting from their number one school that has the same standard of admission as the Association of American Law Schools but has not joined it, fourteen. In this respect the Law School of the University is thus above the average not only of the law schools of the country but also of that of the Association of American Law Schools itself.

Young as the Law School is, it has to record the death of two promising young men. Arthur Wellington Price, LL. B., class of 1900, an instructor in the University, and later in the Law School, was by ill health compelled to resign and to abandon the practice of law in 1901, and passed away, after a lingering illness, at the home of his parents at Carmel, Maine, January 9, 1904. Walter Granville Mansur, of Pittsfield, a member of the Junior Class of the Law School, departed January 5, 1903. Memorial services were held this January in memory of the anniversary of his death. He was the brightest ornament of the Law School, and a true hero in life's warfare. His memory is a perpetual inspiration alike to the faculty and the students. His lips are silenced in death, but his life speaks more persuasively than words.

Two Greek letter fraternities, an excellent debating society, and the religious activities of the Bangor churches and of the Young Men's Christian Association supply a healthful atmosphere to student life outside the regular school hours.

The alumni of the school are doing well. Three of them are serving the State as members of the Legislature, one in the Senate, and two in the House.

In the inauguration of any enterprise, whether it be the establishment of a school or the foundation of an empire, there comes a moment when plans and visions must be translated into realities and facts, or everything will end in failure. The history of the Law School, in its humble way, teaches us all the old but ever true lesson: Begin, BEGIN, and as to the future, trust in God!

Summer School

THE Summer School of the University of Maine, after only two years of existence, is an assured success. During the summer of nineteen hundred and three, this school had an enrollment of nineteen students, as against thirteen the year preceding, and indications point to a still further increase next year. The students are given the free use of the libraries, laboratories and gymnasium; and have an opportunity to take regular college work under members of the University faculty. The work is planned so that there are many chances afforded for recreation and amusement, and thus are combined the advantages of at least part of a college course and the pleasures of a vacation in one of the most beautiful and healthful parts of America.

Tuition charges are made of ten dollars for residents of Maine and fifteen for others.

CLASS COLORS :—*Dark Red and Dark Blue.*

CLASS YELL :— *Boom-a-racker, Boom-a-racker, Boom-a-racker, rah!*
Hobble gobble! Razzle dazzle! Sis, boom, bah!
Ought four! Ought four! Ching-a-boom-a-lah!
Boom-a-jigger! Rig-a-jigger! Rah! Rah! Rah!

OW fellows, if you want to come in and hear this graphophone which I was obliged to take from the Bangor Sporting Goods Co. in payment for a *Campus* ad. we'll see if it is any good or not. I don't know what the records are but he threw in a dozen for a dollar and a half so I bought them quick."

Marthy Bearce selected a record from the box, carefully adjusted it upon the cylinder, touched the spring and the following dialogue was reproduced:

"Say, P I, who's going with my old girl now?"

"Which one do you mean, Shine, the one who loaned you the lantern?"

"Well, who else do you think I would be inquiring about, you last year's junior?"

"Well, nobody since Squeak Mitchell queered the whole business and the old man introduced a curfew ordinance."

"That's hard luck; but say, P I, how are all the fellows in your class anyhow?"

"They're all right, I guess, barring a few exceptions. They all know how to take care of themselves, except Bassett, and he had to get a wife to take care of him."

"Too bad, but how are times down to the Coup since mother Briggs left?"

"Oh, I tell you Shine, times have changed since Reuben died. Mrs. Reynolds has a rule that all male visitors must leave at ten o'clock, with the exception of Broadwell. He and Miss Copeland are allowed to 'set up' until one. That reminds me of one on Dolly Taylor. You know he and I never looked at the girls, but I am sorry to say that he has become intoxicated with the wine of co-education. He went down to the Coup the other night and the ten o'clock rule slipped from his memory. The co-eds didn't forget it, however, and they had all the alarm clocks in the house going off outside the parlor door every minute after ten. Finally they set 'em off all at once and Dolly left in such a hurry that he forgot to say good-night to Mrs. Reynolds.

"The co-eds suffered a great loss in Miss Webber who was obliged to leave college on account of nervous prostration; but Miss Buck manages the social functions and they always go off in a blaze of glory.

"You wanted to know in one of your letters if Finn Berry was still travelling the back road. Since he moved to Bangor he has been obliged to cut it out on account of expense for car fare. He and Flynt put in last summer in the Maine woods and most of the boys think they have gone daft on the subject. They go 'round muttering unintelligible syllables which nobody can understand about climbing 'Whocutterchunk mountain,' and catching trout that were measured in feet instead of inches. They are now working on a book entitled, 'Lost in Wonderland, or Babes in the Wood.'

"You also wanted to know whether Pete Bean or Jim Sawyer were married. I think Jim is. At any rate he made money enough out of last year's *Prism* to support two wives. Some think that Pete is married too; but I think he is only suffering from a base case of corrosion of the heart. He has cut out dancing now, but he attends all the prize contests and I notice that he always has a woman with him."

"Say, P I, what kind of a crowd stops in Oak Hall now?"

"The crowd hasn't changed for the worse since you left. John Quimby can eat faster than ever and Marthy Bearce uses a new kind of hair

restorer. Runt Sawyer changed his room when Oak Hall was declared under military rule and lives in constant fear lest the inspector will find out where he has moved. Mike Small keeps his old room in the Hall, but he has another room in Old Town which he occupies most of the time. Tommy Herbert and Willie Stewart are leading a busy life this year. It was rumored that they were going to have a marked down sale at the College store, but like everything else at the College store, it was weighed in the balance and found wanting."

"I don't doubt that in the least, P I, but how do you like the new members on the faculty?"

"Oh, the new men this year are all right. Bill Ricker says Farmer Hurd is a 'corker,' and he ought to know because he takes 'Pig Culture' under him. I think we did better this year than we will next; that is, judging from what I have seen of Willie Giles and some others. Willie maps out courses for himself, Judge Parker, Ben Larrabee and other men taking a 'left handed course.' He has pointed out his work to the instructors almost every day and thinks this will get him a place on the faculty list. He thought at first that smoking would bar him out, but since he found out that Conner and Simpson smoke he feels greatly encouraged."

"Is there much doing or excitement since old 1903 left?"

"Well, as for that, there is little to say. You see since the bottom dropped out of the *Prism* business the members of the class have been too crestfallen and dejected to start things stirring, and as the members are obliged to assume the dignity that the position of a senior requires they have relegated the amusement list to the lower classes. But say, you remember Breed, he of unlimited gall and brass, with Phi Kappa Phi aspirations? Well, you would hardly believe that one who had led such an ascetic sort of existence and in whom the faculty had so much faith that they entrusted the chapel roll book to his care, would start out at so late a date to sow wild oats. But last spring at the end of his junior year there were whisperings of suspicious happenings going the rounds that scandalized the inhabitants of the 'quaint little college town.' But this winter, with the ushering in of the new year, he made resolutions to turn over a new leaf and lead a better and cleaner life. And now his con-

science has assumed such proportions that last week he was unable to sleep nights for thinking about a cut that he had forgotten to give Bradford the week before and which failed to cause Bradford a notification.

"But speaking about Bradford, he is as swift as ever. The only thing that ever succeeded in disturbing his mental equipoise was when he was on the *Prism* board and he stayed up nights trying to keep things out about himself."

"Who is basket ball manager this year? I read an account in the paper the other day about an exciting game which was played at Orono between the University of Maine and the Home for Aged Women in Bangor. The article went on to explain that Soderstrom lost his head as usual and the game ended in one of the fiercest scraps seen on the campus since the time when 1903 and 1904 mixed 'em up in the old grand stand, way back in the fall of 1900."

"Yes, Shine, we did have a good schedule this year, one that any college should have been proud of. We played twenty-five seminaries, twelve high schools, ten grammar schools, five kindergartens and wound up the season in one grand triumph by defeating the co-eds in a hair raising contest by the close score of 65 to 60, a banner season which marked an epoch in the history of University of Maine athletics."

"Say, P I, I suppose you go to Brewer every night now that they have a free bridge?"

"Go to Dennysville you —— —— Mormon from Brunswick br-r-r-r-r — click!!

"Well, I'll be darned," said Marthy, bringing the instrument to a stop, "How in the name of all eternal did that record ever come to be mixed up with these?"

It was some time afterwards that Marthy got a satisfactory answer to the above question. Shine was visiting the boys on the campus just before Commencement. In one of the rooms the fellows had congregated to talk over old times, and during the course of the conversation the subject of the mysterious record was brought up. It was Shine who promptly dispelled the superstitions that any one might have entertained in regard to it, by the following explanation :

"Well, do you know we have been hunting for that self-same record for some time, but until now had obtained no information concerning it. It was taken in this way. P I dropped into the office one day and while we were talking one of the girls in the office, who was experimenting with a new dictation phonograph, recorded our conversation just for a joke. All the way I can account for Marthy's getting hold of it is that we recently returned a box of blank records to the Bangor Sporting Goods Co., and that through some accident that record got into the box."

JUNIOR CLASS.

OFFICERS.

President, ARTHUR WINFIELD COLLINS.

First Vice President, GEORGE KEMP HUNTINGTON.

Second Vice President, JOSEPH WILKINSON CROWE.

Secretary, MARION BARRY WENTWORTH.

Treasurer, ROBERT RUTHERFORD DRUMMOND.

Executive Committee.

EDWIN FREEMAN BEARCE,

JOHN AUGUSTINE McDERMOTT,

FRANK LEROY FLANDERS.

CLASS COLORS:—*Brown and White.*

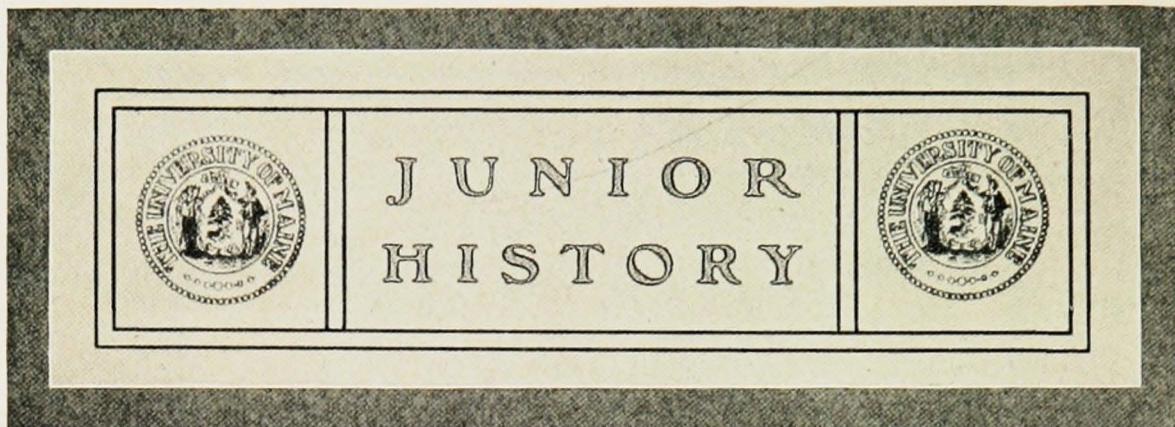

CLASS YELL:—*Rah! Rah! Rah!*

Boom-a-lacker-lee,

In the push we'll always be;

M-D-C-C-C-C-V

Maine! Maine! Maine!

HOW can we suitably extol Thy virtues and illuminate Thy noble record, O illustrious class of—! we leave the rest to the imagination. As the above explosive tries to indicate, we cannot tell of all the meritorious things that we have done, in a few short pages. Neither shall we try. Actions speak louder than words and *our* actions have been especially eloquent. If we were to speak of our past record we would have to tell how we have never lost a class game at football or baseball, how as Sophomores we had the Varsity captains in each of these branches of athletics, and how in our Junior year we had seven men on the football team. We should also have to state the fact that one of our number at present holds the state record for the pole-vault and high-jump.

After saying all this—in a low tone of voice—we should go back to our callow Freshman days again and recall how nobly we battled with Lewis Siff, how we laughed at Honey's venerable jokes, and how we worked for those ninety per cent marks. Ah, how long ago that seems! That Freshman year was marked by our many inventions. From out our midst came the noble band of temperance workers known as the "Grangers;" we successfully held the first and only "Freshman Hop;" successfully and artistically decorated the stand-pipe; and did successfully several other foolish things.

As Sophomores we broke the baptismal record by immersing twenty-five Freshmen in one night, won all our class scraps despite the strenuous efforts of the Juniors, and ate the Freshman Banquet. We were presented with six bushel of fine double-jointed peanuts for beating the Freshmen at baseball, and in order to give them their money's worth we proceeded to beat them at football as well. But all this has been told before.

At last we have arrived at the more dignified position of Juniors and are manfully striving to put away childish things—with indifferent success. We are as yet in a transitory state, however, and changes are taking place among us continually. "Grunter" Bailey has not yet stopped growing, "H O" Beale is becoming Queerer Every Day, "Doc" Thatcher is still considering whether or not to raise a beard, and Clayton Wash Bowles continues to ask foolish questions in the class room. "Willie" Lang has fallen into a gentle slumber from which he partially arouses himself at meal time. George Carle has left off chewing and taken honors in Mechanics.

Notwithstanding all this we believe that our transition is upward rather than downward. We are living in the hope that the All-controlling hand of Time may, in duesason, wipe the "eternal smile of emptiness" from the face of Charles Leon Foubert, sustain the failing strength of "Fat" Learned, and dash the wine glass from the trembling hand of "Seedy" Smith. Then and not until then, in the words of the orator, can we stand as a class before the world and say in truth,—Seniors we are, and Men.

COLLEGE HONORS.

Abbott, Curtis Eames, $\Phi K \Sigma$,
Maine Wesleyan Seminary. Locke's Mills.
Class Executive Committee (2); Executive Committee Ath-
letic Association (3); Secretary Civil Engineering Society (3). Civil Engineering.

Alton, Ralph Henry,
Lynn English High School. Lynn, Mass.
Glee and Mandolin Clubs (1), (2), (3); Manager Musical
Clubs (3). Electrical Engineering.

Ames, Bertram Eugene, "Beet," $A T \Omega$, Lynn, Mass.
Lynn English High School. Civil Engineering.
Glee Club (2), (3); Corporal (3).

Anthony, Gould Roydon, "Mark," $\Phi K \Sigma$,
Scotland, Conn.
Scotland High School. Latin Scientific.
Entered Class of 1905 in Junior Year from Bangor Theo-
logical Seminary.

Armstrong, George Otty,
St. John High School.

St. John, N. B.
Electrical Engineering.

Bachelder, Herbert Walter, "Bach," $\Phi K \Sigma$,
Winthrop High School. East Winthrop.
Class Track Team (1), (2); Varsity Track Team (1); President
Junior Mechanical and Electrical Society (3).

Bailey, Charles Lester, "Grunter," $\Sigma A E$, Auburn.
Edward Little High School. Civil Engineering.
Class Track Team (1); Manager Class Track Team (1);
Class Basket Ball (1), (2); Class Foot Ball (1), (2); Captain
Class Foot Ball (1); Varsity Foot Ball (1), (2), (3); Captain
Varsity Foot Ball (3).

Balentine, Florence, $\Delta \Sigma$,
Maine Wesleyan Seminary. Orono.
Class Second Vice President (1); Class Secretary (2). Classical.

Beale, Harry Orlando, "H O,"

Orono.

Anson Academy.

Civil Engineering.

College Band (1), (2), (3); Executive Committee Athletic Association (2); PRISM (3).

Bearce, Edwin Freeman, "Eddie," B Θ II, Auburn.

Edward Little High School. Electrical Engineering.

Class Vice President (1; Class President (2); Class Foot Ball (2); Captain Class Foot Ball (2); Class Track Team (1), (2); Class Basket Ball (1); Captain Class Basket Ball (1); 'Varsity Foot Ball (1), (2), (3); 'Varsity Track Team (2).

Bird, Ralph Butler, "F lab," B Θ II,

Rockland.

Phillips Andover Academy.

Mechanical Engineering.

Class Base Ball (2); 'Varsity Base Ball (2). Entered College as a Sophomore in the class of 1905.

Blaisdell, Harry George, "Bluffer,"

Bangor.

Bangor High School.

Civil Engineering.

Bowles, Clayton Wass, $\Phi\Gamma\Delta$,
Columbia Falls High School.
Corporal (2).

Columbia Falls.
Civil Engineering.

Brown, Archer Norwood,
Orono High School.
Executive Committee Athletic Association (1); Class Track
Team (2); 'Varsity Track Team (2). Stillwater.
Electrical Engineering.

Carle, George Wilmot, "Baron,"
Portland.
Portland High School.
Corporal (2); Sergeant (3); Executive Committee Athletic
Association (3); Junior Promenade Committee (3). Civil Engineering.

Chatto, Byron Herbert,
Maine Central Institute. East Surrey.
Electrical Engineering.

Collins, Arthur Winfield, "Pat," $\Phi\Gamma\Delta$, Caribou.

Fort Fairfield High School. Civil Engineering.

Class Base Ball (1), (2); Class Foot Ball (2); Captain Class Base Ball (2); Varsity Base Ball (1), (2); Varsity Foot Ball (2), (3); Class Vice President (2); Class President (3); Aid Sophomore Hop (2); PRISM (3); Student Council (3).

Cotton, Ernest Linwood,
Westbrook High School.

Cumberland Mills.
Chemical.

Cowan, Benjamin Mosher, "Cohen," $A\Gamma\Omega$, Biddeford.
Biddeford High School. Electrical Engineering.
Class Track Team (1); Glee Club (2).

Cowles, Harry Davis,
Athol High School.

Athol, Mass.
Chemical.

Crowe, Francis Trenholm, "Dummer," Σ A E,
Mattewan, N. Y.
Dummer Academy. Civil Engineering.
Class Debate (1), (2); Corporal (2); Sergeant Major (3);
Campus (3); Chairman Calendar Committee (2); Aid Sophomore
Hop (2); PRISM Artist (3); President Junior Civil Society (3).

Crowe, Joseph Wilkinson, "Jim," Σ A E,
Mattewan, N. Y.
Dummer Academy. Mechanical Engineering.
Class Track Team (1), (2); Class Foot Ball (1), (2); Manager
Class Track Team (2); Assistant Manager 'Varsity Track Team
(2); Manager 'Varsity Track Team (3); Class Second Vice Presi-
dent (3); Vice President Junior Mechanical and Electrical
Society (3); Sophomore Hop Committee (2); Junior Promenade
Committee (3).

Dinsmore, Ernest LeRoy, "Dinnie," Σ A E, Whiting.
Lubec High School. Latin Scientific.

Dow, Henry Kingman,
Oldtown High School.
Sophomore Prize Declamations (2).
Oldtown. Classical.

Drummond, Robert Rutherford, "Bob," K Σ, Bangor.
Bangor High School. Scientific.
Glee Club (1), (2), (3); Mandolin Club (1), (2), (3); Banjo
Orchestra (2), (3); Secretary Musical Clubs (2); Secretary
Deutscher Verein (2); Class Treasurer (3); PRISM (3); Chairman
Junior Promenade Committee (3).

Fifield, Ralph Herbert, "Fife," Φ Γ Δ,
Dexter High School.

Dexter.
Special.

Flanders, Frank Leroy, "Scabo," A T Ω, Howard, R. I.
Belfast High School. Civil Engineering.
Class Base Ball (1), (2); Sophomore Hop Committee (2);
Sophomore Prize Declamations (2); Class Debate (2); *Campus*
(2); Editor-in-Chief PRISM (3); Assistant Manager 'Varsity Foot
Ball (3); Manager 'Varsity Foot Ball (3); Vice President Ath-
letic Association (3).

Foss, Howard Colburn, "Pop," A T Ω, Boston, Mass.
Farmington High School. Electrical Engineering.

Foubert, Charles Leon,
Connecticut Agricultural College.

Danbury, Conn.
Scientific.

French, Prentis Edwin, "Pink," Σ A E, Turner.
Leavitt Institute. Electrical Engineering.
Class Foot Ball (2); Sergeant (3).

Gulliver, Edward Charles, "Eddie," Portland.
Portland High School. Civil Engineering.

Harlow, Clarence Burr, "Duke," Brewer.
Brewer High School. Electrical Engineering.
Corporal (2); Sergeant (3).

Harvey, Bartle Trott, "Bottle," $\Phi\Gamma\Delta$,
Orono High School.
Corporal (2); Mandolin and Banjo Club (3).

Orono.
Scientific.

Haskell, Ralph Webster, "Rascal," $\Phi\Gamma\Delta$, Westbrook.
Westbrook High School. Mechanical Engineering.
Corporal (2); Sergeant (3),

Hayes, Andrew Jenkins, "Shy," $\Phi K \Sigma$, Oxford.
Hebron Academy. Civil Engineering.
Class Track Team (1); Varsity Track Team (1); Sophomore
Prize Declamations (2); Holder of College Record for the Mile
Run.

Higgins, Roy Edwin, $\Phi\Gamma\Delta$, Brewer.
Brewer High School. Electrical Engineering.
Class Track Team (1), (2).

Hilliard, Edward Knight, $\Phi\Gamma\Delta$,
Oldtown High School.

Oldtown.
Scientific.

Hilton, Horace Alden, "Hod," $B\Theta\Pi$,
Bangor.
Bangor High School. Civil Engineering.
Class Track Team (1), (2); Corporal (2); First Sergeant (3).

Huntington, George Kemp, "Hun," $\Phi K \Sigma$,
Lynn, Mass.
Lynn English High School. Electrical Engineering.
'Varsity Basket Ball (1), (2), (3); Class Basket Ball (1), (2);
Winner Sophomore Prize Declamations (2); Class Treasurer (2);
Captain Class Basket Ball (2); Class Debate (2); Assistant Business
Manager *Campus* (3); President Y. M. C. A. (3); Quarter-
master Sergeant (3); Assistant Treasurer Athletic Association
(3); Secretary Athletic Association (3); Kidder Scholarship (3);
Class Vice President (3); Student Council (3); Business Manager
PRISM (3); Aid Junior Promenade (3).

Huston, Milton,
West Falmouth High School.
Entered 1905 in Junior Year from Tufts.

West Falmouth.
Scientific.

Johnstone, Leslie Ingalls, A T Ω,

Milford.

Milford High School.

Civil Engineering.

Corporal (2); Sergeant (3); Assistant Business Manager 1904
PRISM (3).

Kay, Frank Wilbur, "Muck," Θ E, Fiskdale, Mass.
Hitchcock Academy.

Mechanical Engineering.

Kenrick, William Winslow, "Rip," Σ X, Lynn, Mass.
Lynn Classical High School. Civil Engineering.
Class Executive Committee (2); *Campus* (2), (3); Aid Sophomore Hop (2); PRISM (3).

Lang, Charles Libby, "Willie," Φ K Σ. Harrison.
Bridgton Academy. Electrical Engineering.
Campus (1), (2).

Learned, Frank Everett, "Fat," A T Ω, Waterville.
Waterville High School. Electrical Engineering.
Class Foot Ball (2); Class Base Ball (2); 'Varsity Foot Ball
(2), (3).

McClure, James Harvey, "Havey," B Θ II, Bangor.
Bangor High School. Latin Scientific.
Glee Club (1); Mandolin Club (1); Class Track team (1),
(2); Tennis Championship Doubles (1); Aid Sophomore Hop
(2); 'Varsity Tennis Team (2); Corporal (2); First Sergeant (3);
PRISM (3); Floor Director Junior Promenade (3).

McDermott, John Augustine, "Jack," A T Ω, Biddeford.
Biddeford High School. Mechanical Engineering.
Sophomore Hop Committee (2); Floor Director Sophomore
Hop (2); 'Manager 'Varsity Base Ball (3).

Maddocks, William Samuel, "Bill," Oldtown.
Oldtown High School. Electrical Engineering.
Bugler (1), (2).

Martin, Lloyd Arthur, "Lid," A T Ω,
Oldtown High School.
Corporal (2.).

Oldtown.
Civil Engineering.

May, John, "Toff," A T Ω,
Rockland High School.
Aid Junior Promenade (3).

Rockland.
Electrical Engineering.

Mitchell, Lester Hale, "Gussie," Φ Γ Δ. West Newfield.
Fort Fairfield High School. Civil Engineering.
Class Base Ball (1), (2); Captain Class Base Ball (1); 'Varsity Base Ball (1), (2), (3); Captain 'Varsity Base Ball (2), (3); Class Foot Ball (2); Chairman Sophomore Hop Committee (2); Class Treasurer (1); College Band (1), (2); Aid Junior Promenade (3).

Moody, Clare Joseph, "C J,"
Eastern Maine Conference Seminary. Civil Engineering.
College Band (1), (2), (3); First Sergeant (3).

Moody, Percival Ray, "Rat," A T Ω, Biddeford.
Biddeford High School. Electrical Engineering.
College Band (1); Junior Promenade Committee (3).

Pennell, Charles Weston, ΣX, Gray.
Pennell Institute. Civil Engineering.
Sergeant (2).

Powell, Mabel Frances, "Babe," Δ Σ, Orono.
Orono High School. Scientific.
Class Secretary (1).

Ricker, William Jewett, "Bill," Σ A E, Turner.
Leavitt Institute. Agriculture.
Class Foot Ball (1), (2); Class Track Team (1); Varsity
Foot Ball (3).

Rogers, Elmer George, Θ E,
Brunswick High School.

Bowdoinham.
Civil Engineering.

Rogers, Robert Fisher, Θ E,
Topsham High School.

Bowdoinham.
Civil Engineering.

Sampson, Freeman Marston,
Gorham High School.

Gorham.
Chemical.

Sands, Roy Granville,
Foxcroft Academy.
Corporal (2); Sergeant (3).

Foxcroft.
Electrical Engineering.

Seabury, Ralph Lowe, "Pseudo," Θ E,
Yarmouth High School.
Band (1), (2), (3).

Yarmouth.
Chemical.

Shaw, Walter Jefferson, K Σ,

Brewster Academy. Electrical Engineering.
'Varsity Track Team (1), (2); Class Track Team (1), (2),
(3); Captain Class Track Team (1); Worcester Team (2); Class
Foot Ball (2); 'Varsity Foot Ball (3); Holder of College and
State Records for the Pole Vault and High Jump.

Orono.

Smith, Carl David, "Seedy," Φ Γ Δ, Skowhegan.
Skowhegan High School. Mechanical Engineering.
Glee Club (1); Band (1), (2), (3); Sophomore Prize Decla-
mations (2); Sophomore Calendar Committee (2).

Smith, Dwight Freeman, Φ Γ Δ, Skowhegan.
Skowhegan High School. Mechanical Engineering.
College Band (1), (2), (3); Instrumental Clubs (2).

Snell, Roy Martin, $\Phi\ K\ \Sigma$,

AHISTORY, eh? Well, there ain't no sense in writin' et down for if thair is enny critter thets still in ignorance 'bout us, he must be so fur back in the woods, that no book culd ever reach 'im an' he might as well dye in ignorance. But for the benefit ov folks arter we're dead i'll say with due modestee that a liklier lot ov blooded stock is seldom run across in these parts. Thair was a lot ov the stuff that goes to make up presidents an' doctors an' agin sume as wuld be a drawin' card fur a circus.

We'd no mor'n got used to the tie-up an' our minds 'customed to the heigh colage bildings befor' we begun to suspect that them fellers that cum the year afore us wus lookin' fur trouble. Et that sum of our breadand milk youngsters begun too whimper and hanker fur their ma's, as it was quite nateral they shuld. But things didn't get real serioux till one nite they sot out to interduce us to the public, as they sed. One bright heffer come aroun' with a lot ov night-gowns and 'lowed as how we'd better fill em. It didn't seem just the proper caper but as we wus anxious to 'commodate we put 'em on an' marched fur a spell, but as soon as we see how folks wus givin us the hoss laff we riled up an' in another half minute the trees and barns wus doin' thair best to hide our shame and humiliasion.

Them fellers seemed set on pesterin' us and ef it wouldn't work one way they wus boun' to try another. They cum at us next for a try at the grate national gaime of base-ball. We hed some talk about who ought

too win an' we finally agreed that three bushels ov peanuts wuld be none too much to satisfy the carnal cravings ov the winner.

Now we had a young feller who culd jerk a ball wors'n the hind foot of the orners't mule livin. Fact was, thair warn't but one or two as had nerve 'nough to get in front of that arm an' them as did cume away ruther dazed. How'd it cum out? Oh, they went 'round the squair once mor'n we did but they wus mighty quiet when it was all over.

Well sir, it warnt a week arter that 'fore they commensed to sniff, snuff 'round for them peanuts. It seemed terrible foolish bein' as how they must know that three bushils ov peanuts can't grow in a minit. Did they get 'em? Why sartin you'd a thought the critters had put nuthin into them heavier'n oat straw fur a month, ef you'd seen them bare down on them peanuts. Fact was, we got tender hearted at the sight an' lowed as how we'd give the poor critters a square meal fur once. At that Farther Locke and T. Wilson piks to Bangor and fetches up three bushels more for the poor cusses.

Arter this things run along mighty quiet fur a spell. Them sophs was like a big dorg lying in the sun arter a heavy meal. Things didn't hang long on the hook fur pretty soon they begun to rouse up a little and Dan Cony 'lowed he heared em talkin' 'round amongst themselves about a foot ball game. That news troubled us sum but old Tom Reed riz right up and reckoned that we culd beat 'em at any ov thair new fangled gaimes. He went on too tell us how he'd seen one played at a circus that came to the Falls the year before, an' 'fore he got thro he'd worked up 'thusiasm 'nuff to tip the big monyument in the squair wrong side up.

How'd it cum out, you ask? Oh, that game didn't 'mount to nuthing, no sense to it furs i can see. Just like turnin' a lot ov calves loose at one little pail ov milk. The calf that wuld weigh the most gets the milk.

Things began to chirk up a leetle toward spring an' we beat them fellers wors'n time in every way that they 'turned. I 'member how one time our fellers got up a big feed down to the city an' then askt them to pitch in and help eater up. There wus sum sort of argument 'bout the time the eating was to commence and it all ended in a rumpus which we wun as usual.

Yes, thair was bad blood that was boun' to out and out et did. Twas just 'bout the time the ground gets meller and soft ready fur plowin that they started in ter wallop us. Now they had been pesterin' us with nasty tricks such as turnin' water down our backs etc., until we wus just like a Norweggian bull-dorg that hes been fed raw meat fur a month. What happened, you say? HO! HO! Haw! Haw! Well you'd better ask Ed Bearce, Green Fellow, John Longleaf, E. O. Swaatsur or sum ov them fellers as wus in a persition to know. That was the last caper that they tried to cut up that year as we had to hustle home fur hayin' soon arter.

We wus all mighty glad tew get back agin las' fall, get into the Atmost phere of 4-ply intellectuality and meet them Souls that are above the sordid considerations ov work-a-day commercialism (that is, chores an' the like.)

Things wus considerable different than they wus the year before, we had riz up a peg and the institootion had got a whole parcel of odds and ends to fill our place. We sort ov felt our sponsiblity over them, but it was a pretty tuff job, weeding aout and cultivating enny sech scab lot jest off'n the farm. We've worked on 'em ever sence they first appeared an' I can't see no great improovement. Did we play 'em at base-ball? Why sartin, we gave 'em the whole run ov colledge customs, games, scraps and the whole business, but thair warnt kick enough in 'em tew skurly make et interestin'.

Twas well 'long in the fall that some origernal cuss 'mongst 'em got his idees runnin' on painting and writin' synes that warnt eggactly complementary tew us. Thair warnt no way we culd get at the individual so Banks (He wus our cap'n) ses he didn't see no other way 'cept to light into the whole parcel ov em an' deal out the wrath in equal quantities. We 'lowed he wus right an' that thair was nough sed.

Next night thair was trouble fur them freshmen and plenty ov it. Rocks and mountains wa'nt suffishent tew hide 'em from scouters we sent out to herd 'em up. Chairs didn't seem to hev much 'traction fur the fellers fur a few days arter that. They wus willing to eat their meals off'n a shelf or enny convenient plase.

Are we thro' with 'em? Not by a long-short; w've just begun, but I doan hardly 'spect we can do more'n make 'em 'bout so,—so, fair to middlin' sophomores.

THE following orders were found by Sherlock Holmes and Stealthy Steve, while following up a clue to the "Mystery of the Standpipe, or How Long Will '07 Remain on its Supreme Height?" After a long correspondence, and at great expense, we are able to publish them for the first time in this country.

HEADQUARTERS OF THE FOURTH DIVISION }
OF VERDANT RECRUITS FOR THE ARMY }
OF THE UNIVERSITY OF MAINE.

ORONO, Maine, July 4, 1903,

SPECIAL ORDERS No. 1.

All male graduates (and a few female) of preparatory schools who are willing to leave the comforts of home and who wish to probe the mysteries of "Trig," are ordered to assemble on the University of Maine Campus, September 17th, prepared to receive their first lesson in military science, said lesson to take place in front of the Chapel. The morning will be spent in cavalry exercises under the watchful eye of experienced (?) teachers, who will furnish the horses. It is not expected that you will be able to ride very well at this time, but later you must become familiar with that noble beast, the horse, as he is a great friend to the human race (especially during exams.). The supply of whips will be low at this time but your instructors will be able to secure a few 'persuaders' of

various lengths and thicknesses. Each recruit is instructed to bring a bottle of "Pain Killer" in his outfit.

(Signed)

A. TIN SOLDIER,

Rubberneck Commanding Battalion.

HEADQUARTERS OF THE FOURTH DIVISION }
OF VERDANT RECRUITS FOR THE ARMY }
OF THE UNIVERSITY OF MAINE. }

ORONO, Maine, September 18, 1903.

SPECIAL ORDERS No. 6.

Each recruit must have a white undress uniform, consisting of a cap and "nightie," for the first battalion review,—the "Night Shirt Parade." The parade will be formed at 11.30 p. m., and it is very desirable that all make a good appearance as the Mayor of Orono and his Military Staff will review the battalion in front of the post-office. During the evening volunteers will be called for to furnish an entertainment and it is hoped that all may respond cheerfully in order to prevent further pollution of the river.

The signal drill will be given this year similar to that of the past year. This drill or "Flag Rush" takes place near the athletic field and here the raw recruit will learn how to meet defeat. This is a very useful lesson.

Immediately following this there will be a lesson in Strategy and the Art of Base Ball, when the recruit will be shown how a modern weapon should be used, and will fire a few rounds into his instructors. The final result of the shooting will be a score of 9—2 in favor of the instructors.

(Signed)

A. TIN SOLDIER,

Rubberneck Commanding Battalion.

HEADQUARTERS OF THE FOURTH DIVISION }
OF VERDANT RECRUITS FOR THE ARMY }
OF THE UNIVERSITY OF MAINE. }

ORONO, Maine, October—, 1903.

GENERAL ORDERS No. 444.

Recruits are ordered to remove certain "red cross signs" from the roofs of buildings, and although military orders forbid you to discuss instruc-

tions with your superiors (?), it may give you personal satisfaction to know that you cannot erase white signs with red paint. Red paint over a white sign leaves a very neat and bright pink sign, especially as viewed from the opposite bank of the river.

Your instructors will post instructions, rules, regulations, etc., which you must observe, in many conspicuous places. This is always done during the night to save time—and trouble. To disobey these rules or to make use of your own ideas will lead to the application of a compound formed by mixing equal parts of "frog pond," iodine and green paint. This is applied externally and allowed to soak in, and in extreme cases the persuaders or "dust extractors" will be brought into use to hasten the anticipated result.

(Signed)

A. TIN SOLDIER,

Rubberneck Commanding Battalion.

HEADQUARTERS OF THE FOURTH DIVISION }
OF VERDANT RECRUITS FOR THE ARMY }
OF THE UNIVERSITY OF MAINE. }

ORONO, Maine, November 12, 1903.

SPECIAL ORDERS No. 7.

Having elected battalion officers, the recruit will report for his first battle on November 13. This battle is known as the "Peanut Scrap," and the plan of battle will be left in the hands of your leaders. After your scouts have reported that the opposing force has been located you will advance in irregular order, and after a "Fight" of short duration you will return to your camp to get your rations at the hands of your victorious adversaries. Here you have license to feel that the honors are about even.

A squad from the recruits will be detached on a foraging expedition to Brewer. The success of this expedition will serve to encourage you and you will send out another foraging expedition. This time you will be met by a detachment of your natural enemies, and will suffer still another

defeat. This lesson will be fixed in mind by the ringing of bells and much shouting of:

1906 — 15; 1907 — 0.

(Signed)

A. TIN SOLDIER,

Rubberneck Commanding Battalion.

The above orders will be handed down to the next generation as the history of the freshman year of the class of 1907; but the future will add

CLASS ODE

A song, a glorious song, boys,
Of Nineteen Hundred Three.
Dear Alma Mater, fair old Maine,
What shall we sing of thee?
Our song should tell of trials past,
Of triumphs won as well,
And yet no song of joy or pride
Can hold the word Farewell.

REFRAIN

To Maine, Mother Maine,
Her glory and her gain,
May songs resound from sea to sea
In praise of good old Maine;
We pledge our hearts and hands, boys,
As we raise the refrain,
That Nineteen-Three will ever be
Loyal to Mother Maine.

Farewell, the hour has come, boys,
When we at last must part;
Our Alma Mater decks our brows,
But tears are in the heart;
Behind, the primrose path of peace,
Before, the battle plain;
Come boys, once more join hands with me
And sing of good old Maine.

The traveller up the toilsome steep
Has reached the crest at last;
The pilgrim at the wished-for shrine
Now turns to view the past;
The journey's done, the goal is won,
Farewell to toil and pain;
Here's three times three, old Maine, to thee,
Again, boys, and again.

RETROSPECT

ON the cinder track the spiked thistles were flourishing, blossoming, and delighting in the last days of the summer vacation, unthoughtful of the cleated football shoes that were soon to pound them to death; the last trace of lime was disappearing from the tennis courts in the profusion of weeds; the grass on the sloping lawns was high and untrodden. The college was enjoying the last few days of its summer rest and its deserted halls slept on regardless of time; for the clock on Wingate's tower never struck, nor did the downward fluttering flag, at sunset, mark off the passing days. In all the University the only trace of life to be found was in the vicinity of the college office. So the campus has looked during a score of other summer vacations and will look during vacations to come, as calmly serene and peaceful as an oasis at noonday.

Weeks passed and the chapel again thronged with returning men, filling joyously to the old seats and talking merrily of the newcomers, who had just furnished, under the direction of the sophomores, an ample "first chapel" entertainment. The air was alive with the feelings of good fellowship and jollity that appears with each new year. Only the one trace of sadness was present and of that the President spoke in the opening words. Queen Mary of England once said that upon her death the word Calais would be forever engraved upon her heart. May the memory of Henry K. Crocker and Frank F. Veazie be engraved in our hearts. In the rush of the opening year they were not forgotten, nor will they ever be forgotten as long as nobility of character is held by Maine students to be of preeminent worth.

As the meeting in the vaulted chapel went on, each of the hundred and fifty men in the back rows must have realized that this beginning of the college year began a new epoch in his life—an epoch in which there would be plenty of work to be done, plenty of honors to be gained for Maine; for Farley spoke that morning in the interest of football. Others of college fame had preceded him but none had received such an ovation as was accorded "the gentleman coach." In his talk there was no boasting nor bragging, but when he had spoken a few words of encouragement to the football aspirants and promised, with their help, to lead them to honorable victory, or, when the fates decreed, to honorable defeat, few there were but gained in confidence. Cheers followed—cheers of the kind that thrill—and if the freshmen did not catch the Maine spirit at this "first chapel" it was their own fault.

Time passed, and still football was the focus of all interest. True that for a while the underclassmen put their attention into the usual interclass contests and "scraps." The freshmen lost the flag rush and base ball game and learned a good deal about things in general. Then comes the Harvard game and class spirit changed into college spirit and every one turned out to cheer the team into a state of enthusiasm that should carry it to a virtual Maine victory at Soldier's Field, Cambridge, on October third. Well is this game worthy of a place in our college annals, and among the red-letter days in our calendar we may proudly place the date which marked the beginning of a new era in our football history.

Bruised, battered, and confident of future easy victories—a combination which resulted later in evil consequences—the football men returned for a two weeks rest before the Colby game. The college also took a short breathing spell, interrupted only by the small pox scare and the new Oak Hall military regulations. For a long time Orono had been thickly dotted with warning red flags, vaccination began to come in vogue, while timid people stopped patronizing the cars for fear of infection. At this time the large and magnificent pest house at the edge of the woods was erected in anticipation of possible cases among the students. The methods of living at Oak Hall were suddenly discovered to be slack and unsanitary and the so called "iron clad rules" were adopted, and so successful was

the sweeping of rooms by rule and the daily inspection, in preserving health, that the disease came to Orono, stayed a month and went away without claiming a single person at the University as a victim. But as a rival to the other new structures on the campus, the pest house still stands, grimly looking from the shadow of the woods, remote and gloomy.

Not so with the other structures added to our equipment of buildings during the year. Instead of being remote from the centers of college activity, they are situated in the very midst of our campus. Lord Hall, the entirely new engineering building, and Holmes Hall, the remodeled agricultural building, have been added this year. Slowly and surely our campus is being beautified and with the completion of Lord Hall and the removal of the old shops, the University of Maine will assume an appearance inferior to that of no other university in the country. Then, too, there are new frat houses going up each year and during this year the local chapter of Phi Kappa Sigma has moved into its handsome new house.

But to resume. Maine night soon arrived and the hundreds of alumni, students and those interested in the University, assembled in the chapel to view the new additions to our collection of trophies, to renew their youth — where it needed renewing — listening to the cheers, and by their presence to encourage the brawny football men to slay Colby on the morrow. A pleasant program and carried out in its entirety on this last October sixteenth. Well, indeed, has Maine Night been called a breeder of enthusiasm, and as the honored members of the football team filed out during the intermission before the dance, they must have carried some of the do or die spirit with them to help them in the game next afternoon.

Unfortunate circumstances, coupled with over confidence, came near losing the game for Maine, however. It was the first and last time during the season that the men in blue became conceited; for before the team from Colby had ceased its almost winning rushing, the men realized their true needs and conditions. Still we won and the bell rang just as hard and the whistle blew as long as though the score had been four times as large. But from that time on the team was inspired with a great determination since only half a month later they were to meet Bowdoin on Whittier Field.

And never did time fly faster than during those days of anticipation.

Each afternoon found the squad hard at work on the field, watched by an admiring and anxious throng of students, who spent their time in practicing old and devising new cheers. It was at this period that the famous "Woski Wow Wow!" was first heard about the campus. From whence it came and by whom formulated is a mystery, but it has come to stay. It was tried on Bowdoin and it worked.

But this is another story — a story that begins as the special train grinds out of Orono; reaches its climax the afternoon of the same day on Whittier Field; and ends with the triumphal return to Bangor. It is a story which three hundred eye witnesses from Maine could tell with as many variations and which would be substantiated by as many disappointed Bowdoin supporters — the tale of another Maine victory beneath the whispering pines of old Bowdoin. The story has been told and retold and it is needless to repeat it here. Bailey's phenomenal run, Bean's goal from the field, a few rushes and it was all over. The second step toward the football championship of the state had been taken.

There remained but one other step and that was taken on a snow-encircled field, a little over a week later. Winter had, in advance of his usual schedule, seized Orono in his icy grasp. A blizzard came and when the Bates team arrived on the campus, a dreary sight of whirling drifts awaited them. There was nothing to do but await a more favorable day which came on the Monday following. As the combined result of a good spell of weather and a good deal of shoveling, the snow-covered field was cleared. Few there were who listened to the church bells that Sabbath morning, and those who did were seized, dragged to the football field, and introduced without ceremony. And the next day the hard working crowd received its pay, for Maine won the third game of the college series and the championship was again hers. Of the last two games of the season we have nothing to say except that we lost them, one to Holy Cross and one to Tufts.

But with the Tufts game came Coach Farley's departure from college, and now that he was going the students cast about for some method of showing their appreciation of his great work, interest and sympathy. As a result he was presented with a loving cup at an alumni banquet in Boston. On its face was this inscription:—

Presented to
J. WELLS FARLEY
as a token of the esteem in which he is
held by his friends and members of the
University of Maine Athletic Association
1901-1903

So Farley was gone, but enough of the football spirit was left among the two lower classes to carry them through a hard fought game which the Sophomores won by a score of 15-0. Then, on the eve of the Thanksgiving vacation, suits were laid aside, the mud scraped from the cleated shoes and the football season of 1903 had closed.

And now at least we should expect the fever of chasing the pigskin to give way to the study fever. But such things never happen in real life and little more of the midnight oil was burned after vacation than before. Yet interest in other departments more or less closely connected with the courses of study, was springing up. Many were the clubs and societies that fought for college support. The Musical Clubs struggled hard for supremacy over the Press Club, while the Junior Civil Society contended equally hard with the Deutscher Verein. Here again we see illustrated the benefits of healthy competition. In a successful season from every standpoint, a score of very enjoyable concerts have been given by the Musical Clubs in as many different places. The Press Club has added much to its influence and the desire that every Maine Daily have its college correspondent from the State University bids fair to become a reality.

One new and much appreciated feature of the present college year was the Lecture Course, which comprised lectures by at least six men of prominence in their professions. Another new thing is the Debating Club, which, under the impetus given it by a challenge from Bates, grew up like the proverbial mushroom in a single night. By this body many questions of great moment have been settled, from the justice of the war in the East to the advisability of co-education (decided in the negative). But one question could never be solved in the halls of oratory,—the relative rights

of the faculty, student council, and student body to decide the length of the vacations.

As for the student body, they were insatiate. Petitioning successfully for a lengthened vacation at Thanksgiving time, they thought to do the same thing Christmas. But the faculty couldn't see things that way and sought to effect a compromise by giving twelve sophomores from Oak Hall and vicinity an extra vacation of two weeks. And it was this apparent show of favoritism to which the student council objected. Yet the twenty-third of December had passed before the great majority left for home with many happy expectations and — especially in the case of the Sophomores — a carefully guarded copy of the Maine Calendar.

Now winter was here indeed and from the football field, long since deserted, people turned for exercise and recreation to the "gym." Again the running track resounded with the crunch of spikes, as the men training for the relay team got into form. As often the basket ball team might have been seen practicing on the floor; while many an evening the hall resounded with the strains of music and the other accompaniments of a dance. And between the universally victorious games of the basket ball team, the successful dancing parties, and the exploit of the relay team at Mechanics Hall, where it defeated Tufts, it would seem that the supporters of the blue should be satisfied.

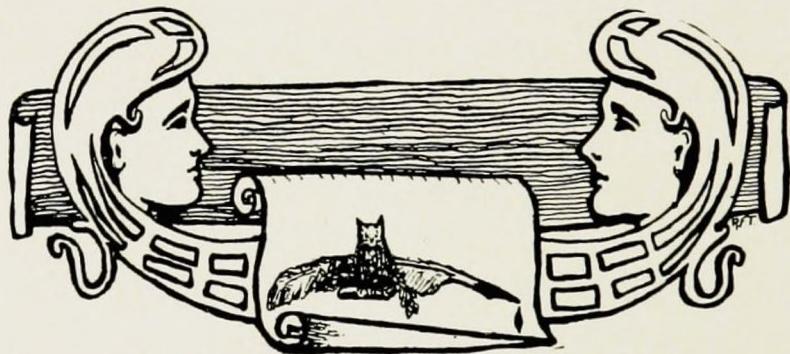

But the question of dividing these honors among the three separate interests is still unsettled. Perhaps the fraternities, who have entertained and gained for the University the good will of the ladies, should receive the greater share of the disputed honors. Perhaps to the basket ball team is due the greater share for its uniformly successful work; for its defeat of Colby; for its most brilliant victory over Boston University. For two twenty-minute halves they struggled with the visitors from Massachusetts and yet the score was a tie. For another fifteen minutes they fought desperately and finally to victory. That is, indeed, an act worthy of praise. But how about the relay team? Surely they must not go entirely without praise; for did its members not train faithfully, practice the straight corner and go to Boston perfect in every way, even in the minor detail of having developed one leg longer than the other, if such reputed

necessity is true. And they won! But the greatest argument in favor of their being deserving of great credit is the fact that they brought back with them coach "Steve" Farrell — Farrell the successful trainer and the man to be depended on from Yale.

Then came "Ruddie" and the base ball men were again happy. All the shadows that clouded Rudderham's stay a year ago had been dispelled.

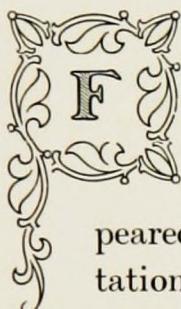

The base ball men had ever liked and respected him; the students were confident of his ability as a coach, and it was regarded as a victory to have him back this year.

And so, with plenty of good material, coaches in whom we have the utmost confidence, and an outlook that is in every way bright, Maine approaches the spring athletic season with high hopes; the PRISM goes to press; and we bid you a long farewell.

THE PARSON A STORY OF THE "UNDERSTOW"

By ONE OF THE "GANG."

FEW of the old men return to the College these days without a feeling of homesickness and loneliness. Everything seems changed — grown out of recollection. White Hall has disappeared; Brick Hall, the scene of so much riot, night raids and devastations, has been dismantled, remodeled and reformed. The "Fields," with their tall waving grass and grain, are no more. Only the sturdy old oak at the front of Brick Hall stands as a memento of the past.

The dream of the past has become a reality. It is no longer the Maine State College, but the University of Maine. The various "halls," the society houses, the lawns, the college streets, — all bespeak a new age and a new generation. But no one condition possesses all the good or all the bad of life, and the surroundings of the old days produced a ruggedness that called for men of considerable vitality.

We studied by the dingy kerosene lamp, froze in our rooms with the aid of the steam pipes, and took our baths in tin dippers. Now the lamp is replaced by the incandescent, the rooms are warm and comfortable, and the ample bath tub has supplanted the tin dipper. Many of us were born short of funds and knew the cost of a square meal and a night's lodging, and many a lad came to anchor at "Maine State" under shortened sail only to be swept away again by the pitiless undertow of financial distress.

When the Parson came to college he came as a derelict, simply drifted in from somewhere and cast anchor. How he got the name of Parson I cannot say. Certainly it was not from any resemblance to that ecclesiastical individual. He swore like a pirate and smoked a great deal with no

preference for any particular brand of tobacco. Suavity was not his long suit,— rather the reverse; and his heavy jaw and pugnacious, turned up nose, pointed unmistakably to the figurative chip that he carried constantly on his shoulder. The Parson was always in trouble. He was uncomfortably aggressive. Brought up in the slums of a large city, where vice and crime were his daily playmates, he had worked his way up and out by sheer brute force rather than by any superior intelligence. Thrown upon the streets at the age of nine, he became a typical boot-blacker, developed into a street arab of most pronounced type, and in the years that followed took on various shades of growth, good, bad and indifferent. When he swore there was a delicious vigor about it that made your mouth water. His propensity for bad tobacco was something awful.

I do not wish to give the Parson a bad character by any means. I write simply of his physical defects. Underneath all was an impulsive, generous nature that, in after years, won and held many friends to him. His very aggressiveness during his freshman year made him a thing to be feared by the sophomores, and a vigorous champion of his class.

He arrived at the College one hot Saturday afternoon in August, carrying a rather dilapidated telescope bag and a cotton umbrella. His clothes were seedy and worn. He wore heavy, cowhide shoes, dust covered and devoid of polish and which failed to make connections with his trousers by two inches. His linen was dirty and begrimed, and surmounting all was a brand new derby hat,—the forbidden “cady.” As he sat on the steps of old Brick Hall waiting for Prexie he looked more like a tramp than a student. His hands were hard and knotted with toil; his heavy jaw worked spasmodically as he furtively masticated a huge cud of tobacco within.

He was in a new world. The odor of the newly mown grass in the neighboring fields stole into his nostrils, the droning of the bees and the whirr of a distant mower crept into his brain. The hard lines about his mouth softened, his eyes grew tenderer and gentler and two or three heavy drops suspiciously like tears trickled down his sullen cheek. His chin drooped upon his chest and quivered a little; his eyes closed; he dreamed. At last, the first goal was won. The dream of years had come to pass. For the past half dozen years he had been building an air castle of wondrous

desires and ambitions in his heart, and now it had become a reality. He was at college, matriculated, passed, accepted, and with a delirious joy he breathed in the delicious, scent-laden air and drank in hungrily with his eyes the curve of the buildings sweeping down to the road — to the shining river below. The campus dotted with spruce, the high bluff across the stream with its scattered gravestones, the spires of the town beyond just showing above the trees; the same scene that has thrilled us all again and again and that sweeps through the heart of every new man as he steps on to the campus of dear old Maine, swept down upon the Parson and through him, and bathed his soul.

Yes, it was no dream. Here he was, "and by G-d here he meant to stay." His jaw closed with aggressive determination and he half rose as if to meet some unseen opposing foe.

The "Gang" had been sleeping the greater part of the afternoon, but as the sun sank toward the west Brick Hall began to wake from its repose. The sound of a guitar was wafted through the halls; the roar of an incipient riot followed; a pillow or two shot out of a window on the fourth floor; a medley of song and laughter — "Coca-che-lunk," "A Tavern in the Town," "Go to Sleep my Baby," "Oft in the Stilly Night" — all mingled into one burst of joyousness; for Brick Hall was a happy place. A head was thrust out from one of the windows and the fat, benign face of Pussy Milliken looked down upon the form on the steps below.

"Holy Moses!" he exclaimed, "What's that?" Then he let out a whoop that brought the rest of the "Gang" to the various windows.

"Hello Sonny, does your mother know you're out? When did you leave home? Where's your hand organ? Take off that cady," were some of the remarks addressed to the form on the steps; but he stirred not.

"Who is he," asked Straddles. "Some new freshman?"

"N-n-n-no," replied Cyclops, "He's t-t-too old f-for that."

"Too old," snorted Tommy Worth, "you're no spring chicken yourself, son."

"W-w-well, I'm no f-f-freshman," replied Cyclops.

Just then a huge mass of water swept through the air and fell on the quiet form beneath. The Parson sprang to his feet and faced the jeers of

the crowd only to meet another equally well aimed pailful. He sprang up the steps and into the corridor roaring like a mad bull; and then began a stream of profanity such as Brick Hall, even in its most disreputable days, had never heard. The Parson stormed the corridors like one possessed; challenged the crowd individually or *en masse*; said he could lick them all in a bunch; blasphemed, stormed and swore until his breath gave out. It was something awful,—the boys stood aghast. In the midst of it all a hand was laid upon the quivering form of the Parson and he whirled about to meet the rebuking eyes of the Doctor.

“ Stevens, what is the meaning of this?” said the Doctor sternly.

The Parson’s eyes fell, he stammered something incoherent and stopped abashed, fumbling his wet clothes and shifting his now muddy boots uneasily.

“ You said you were going to be a man when you came here,” continued the Doctor, “and I fear this is hardly a good beginning.”

“ I was sitting on the steps waiting and they soaked me and by G—I’ll punch their heads.”

“ No, no, not that,” replied the Doctor hurriedly. “ That’s not the way.” Then his eyes softened as he noted the dripping form and the bewildered, defiant attitude of the freshman.

“ I didn’t mean to break away that way,” said the young man humbly. “ I’ll try harder the next time.”

“ That’s right, that’s the only way. You’ll find everybody here ready to help you if you’ll do your part,” said the President quietly as he took the young fellow’s hand. “ Come, I’ll assign you to a room and mate.”

The Parson was assigned to No—on the top floor with a fellow from Groton, afterwards known as Bill Jack; a devil-may-care fellow with a propensity for tobacco equal to the Parson’s, and none whatever for study. Bill Jack was a long, lanky sort of a chap who yawned incessantly, smoked continuously out of a long pipe with green tassels, and was proverbially lazy. He used to cut his tobacco with a big hunting knife which he carried stuck in his waistband. He never took a bath or combed his hair. The two were destined to make a unique pair had not Providence intervened and separated them, to the eternal salvation of each.

That night they were visited by the entire hall — in sections — the sophomores coming in force, but it was noticed that they eyed the new freshman with more or less timidity, and their demonstrations were somewhat tamed. The Parson, in his turn, was in his element. The aggressive air and attitude of the sophomores put him at his ease. He was used to hostilities. They were right in his line, in fact. When they tried to guy him he shot back with street vernacular and delicious slang, and anon, a "cuss" word or two that were like an overcharge of powder to his shots. Every joke and sally of his tormentors was returned to them hot and swift and in language they were unable to cope with, so they withdrew defeated.

"That fellow," said old Strummie, "will have to have his tail feathers and wings clipped. He's too fresh."

"He's a good thing to let alone," said Barret. "Gad, I'm afraid of him."

But the "Gang" as a body held aloof. They were the guardians of the honor and name of the Hall and the Parson was a brand new specimen to them. After the mob had retired that night and the door had been locked and bolted, Bill Jack looked at his new room-mate for a moment with profound admiration, then taking his long pipe from his mouth he held out his hand to the Parson and said, "Old man, shake. You're all right. I guess we can stand 'em off. You're a peach!" That night they slept with their arms around each other like two children and a smile of happiness was on the lips of the lonely Parson all through the night; for sweet comradeship had come to him such as he had not known since childhood.

All true growth and progress is made only through toilsome effort and labor. He who expects to grow from the vicious inheritance of his fathers or overcome the malignant habits of early years by pleasant gradations and sweet scented paths will get bitterly disappointed. No wrong has ever been committed in any age but what a sacrifice is demanded to make it right, either in that generation or the next, and many and many times the sacrifice becomes a vicarious atonement. It is the law of compensation and so the Parson found it. After the newness of his surroundings wore off and he endeavored to adjust himself to the new conditions of life, the bitterness of contrast entered his soul. His life on the street he had

accepted with stoic philosophy, but after he began to study he took to analyzing situations and trying to reason out the cause and effect. Religion he had none, so he was without that comfort. His old mother was toiling daily somewhere in the great city. His drunken father was somewhere out in the great world. He was here fighting for a new life, fighting against habit, early environment, inheritance. His habits and mannerisms placed him at a disadvantage and he was very conscious of it. The chapel service soothed him but five minutes later he would be swearing and jawing at some one for some fancied slight. His ungovernable temper and his supersensitiveness, aggravated by the situation, made the fellows shun him. Yet he tried hard to adjust himself, to control his tongue and temper, to be cordial and companionable, but he did not know how, and many a night he went to his room defeated, hopelessly conscious of his misfit with the new life.

We grow in waves, a crest and a hollow. The fight wages first on the mountain of hopefulness and again in the valley of despair. The Parson won his first victory of growth in an unexpected manner. He had persisted in raising a moustache and wearing the prohibited cady, and though the cady had found a lodging place on the pinnacle of old White Hall, the moustache was not so easily disposed of.

One night about ten o'clock, in the middle of October, a gentle tap sounded on the door, and to the surly growl of Bill Jack's "Come in," the door opened and thirty sophomores, begowned and masked, filed silently into the room. Bill Jack and the Parson sprang to their feet. The last of the masked figures closed the door quietly behind him and for a moment there was absolute silence, during which the Parson, by a supreme effort, got himself well in hand, for he mistrusted what was coming. Then the leader of the masked crowd in sepulchral tones spoke. "Mr. Stevens, since your entrance into this institution you have deemed it expedient to set at defiance all the college customs. You seem to think that a freshman, in spite of his recent acquirements, has the rights and prerogatives of a senior who has been here nearly four years. You have persisted in wearing a moustache and a stiff hat which is contrary to the customs established by long usage in the college. You are entirely out of touch with us both in

speech and mannerisms. You are altogether too fresh, both for your own good and the good of those with whom you come in contact. We've come here tonight to teach you a lesson which, if you submit, will be made as easy as possible, but which if you resist, will be all the worse for yourself. We have deprived you of your cane. We have hung your cady upon the pinnacle of White Hall as a warning to all future freshmen. We demand now that you show final obedience to the customs of the college by submitting to the removal of your moustache. No freshman in this institution is allowed to wear a moustache."

The spokesman delivered this speech with many gestures and bows intended to impress the freshman, and as he finished the entire crowd bowed their hooded heads and said in hollow tones, "So mote it be."

The Parson's gorge arose. A deluge of profanity rose to his lips; but he steadied himself and after a minute's silence began, "Gentlemen, much you have said is true, and a part of it is untrue. I may have seemed to only want to set at defiance many of the college customs. It may be true that I am out of touch here, with my mannerisms and speech. God knows no one is more conscious of this than I am. I have been brought up in a different world than yours,—a world where people were taught to struggle each for himself and where honor and independence were given to him who won it. I came here for an education after six years of hard study and preparation, saving what little money I could. I find here certain conditions and customs which I did not count on and to which I find it difficult to adjust myself. I am going to give the thing a fair trial and if later I find it impossible to become a part of your world I will surrender and go back to the world I came from." The Parson stopped a minute and moistened his lips, then went on. "But, in the meantime, I deny the right to you or to anyone else to dictate to me what I shall wear or how I shall wear it. You have deprived me of my hat. I can buy another. There are thirty of you to-night against two. You will probably be able in the end to overpower us and shave my moustache; but I give you fair warning that in the process some one will get hurt." He stopped, and with a quick movement reached between the mattress and slats of his bed and drew out a smooth hard wood stick, curved like a scimitar. It proved

to be the back and leg of a dining chair—a most formidable weapon. He slipped his wristband and bared his arm to the elbow with the agility of a street boy getting ready for a fight. It was no new trick to him. "I am ready, gentlemen," he said, and his jaws snapped together.

Not a trace of profanity about it, hardly a touch of slang throughout the whole speech. No vestige of temper. It was quiet, direct, forceful. The Parson had had his struggle in the valley alone. He was on the mountain top now. Bill Jack looked at him in amazement, wondering if this could be his hot headed, swearing comrade. One of the crowd was heard to mutter under his breath, "Gad, he's a good fellow to let alone." The long, steady struggle for self control was beginning to bear fruit.

"Well," said the Parson, "When are you going to begin?"

"We don't want any trouble," growled the leader in a surly tone.

"Then be kind enough to leave my room," replied the Parson, and the crowd filed slowly out.

When the crowd had gone and the last man pulled the door to behind him, the Parson laid the stick on the bed, dropped into a chair and buried his head in his arms on the table.

CHAPTER II.

When the Parson came to college he forgot to count on one thing—the cost. The philosophy of the old days had taught him to figure on but one day at a time. "Sufficient unto the day" was his motto. He had little conception of the real value of money or the amount it would take for a college education. In the six years preceding he had saved fifty dollars, a good friend had loaned him twenty-five more, and with the seventy-five dollars nearly, he had landed at the college that hot August afternoon buoyant and hopeful.

One night the last week in October, two weeks after the moustache episode, he sat in his room alone figuring out his accounts. His uniform had been given him, but his board, tuition and books, one suit of clothes and incidentals, had eaten away his seventy-five dollars and he was at the bottom of his pile—or would be at the end of the week. The last two weeks had been joy to him. His attitude had been heralded from end to

end of the campus. At last he had been weighed and not found wanting. The fellows grew cordial. He was invited to join one of the "frats," the "Gang" took him up and nicknamed him the Parson. A new, quiet dignity surrounded him. At last he was a part of it all and accepted as such, and the joy of it warmed his heart and gave him a new world. He swore less and gave up chewing tobacco.

But the money. Here was a new difficulty, and all the next day it hung over him like a cloud. Three weeks ago he would have been glad to quit, but now,—ah, no, there must be some way.

Poor Parson! he was learning for the first time that responsibility of life and the eternal truth that each victory leads on to greater struggles and larger efforts. During the fall he had worked with the other freshmen on the farm Saturdays and had been counseled time and again by that man who will ever find a warm spot in our hearts, farm Supt. Prof. G—. How often we tried the soul of that good man in the hay field or the potato patch I know not, but it must have been many times. We threw away more potatoes than we ever saved, and the pitched battles we had with the spuds stirs me with memories to-day. We did not earn our salt and yet we received ten cents an hour for goodness knows what! I don't.

With the thought of this kindly man fresh in mind the Parson resolved to go to him and lay his case before him, and so Friday night found him wending his way to the farmhouse. As a result of the interview work was offered him digging ditches at twenty dollars a month and board—more than he was worth by half—and incidentally a pair of rubber boots which Prof. G.— donated "To be kept until called for." Prexie gave him a room alone at the Hall where he slept and tried to study evenings and the new struggle began, hopefully but yet a struggle.

It must be confessed that the following four weeks were trying ones to the Parson. The distant call of the recitation bell filled his heart with homesickness and his soul with forebodings; and in the still, frosty air of the morning the shouts of his fellows going to chapel drew his eyes longingly and hungrily to the old buildings.

Was he, who had struggled so hard to become a part of it, to lose it now, to be snatched from it all? The drill and the diamond tantalized

him the most. Occasionally the "Gang" would come over to the ditch and jolly him and warm his heart only to depart again and leave it blacker than before. In the evenings he went to his room and tried to study but usually fell asleep; for digging ditches is not easy work.

During those long days in the ditch he had plenty of time for meditation of the past and for the future, and I have no doubt this was a part of the divine plan for his development. Some people, like machines, need a load in order to run steadily.

The third week in the ditch brought a new difficulty and one that threatened to drag him completely from his anchorage and set him adrift again. The term would close at Thanksgiving, and then the long vacation of ten or twelve weeks during which most of the fellows would be teaching. He was in a strange country; the end of the term would see him not only without work but without a home and without money, for the twenty dollars would just square his accounts. The thought appalled him and he forgot all homesickness in the face of this disaster. Even should he get a school he doubted his ability to teach it. The street arab teaching school was an impossible thing and seemed far beyond him. The days dragged on and the gloom settled in with the fog from the river. The boys kept within doors more, so that he saw less and less of them. The drill ceased; the diamond became deserted. The chapel bell sounded fainter and fainter each morning. His new found world seemed to be slipping away from him; the undertow was tugging hard at his anchors. He inquired of the fellows about schools but no one knew of a vacant one. All were jubilant at the coming vacation and each one busy with his own. The last Sunday was a day of struggle. He shut himself up in his room with his pipe and began his fight with the situation. Over the ground he went again and again, but he found no loophole of escape; the tide was setting in against him. No school, no money, no home, nothing but to go back to the old life and habits. Then the iron entered his soul. He thought of one plan to make an end but it was too horrible and he threw himself on the bed and buried his face to shut out the thought—suicide! ! Why not end it, no one would care.

Monday morning it met him face to face in the first streaks of dawn,

and he tramped up to breakfast with the thing pounding at his brain. He took his pick and went to his ditch and there tried to work it off. At ten o'clock he sat down, tired and hot and reeking with perspiration from his exertion. In the afternoon it became an accepted fate. He was defeated. Nothing remained but the details, he would square his bill, try his exams and go quietly away. But had he the courage? Could he do it? That evening he took from his grip his revolver—a thirty-two calibre—unloaded it and tried to imagine the effect of the weapon against his head, at the heart (just between the fifth and sixth rib he could find it easily), against the temple, then in the mouth (the bullet would clip the spinal chord at the base of the brain if his hand was steady). Then he loaded the weapon and went through it again fingering the trigger lightly. Yes he *could* do it. Then he borrowed a *Materia Medica* from one of the fellows and looked up poisons.

The following day, Tuesday, he secured some chemicals from the laboratory, mixed four doses and looked up their effects. Then he placed the various glasses to his lips and with closed eyes thought over the effects on the various organs until he could almost feel the thing work. Wednesday was his last day in the ditch. He reviewed the situation again, driving the pick into the clay as if to kill any misgiving. He could not go back to the old life now that he had tasted the new. It might mean a worse death than this. The memory of the better things would mock him and—a cough sounded behind him and he looked up with a start. There stood Prof. B——smoking the ever-present cigar and smiling gravely down at him.

“ You seem to be working hard this morning, Stevens.”

“ Yes sir.”

“ Pretty hard digging, isn’t it?”

“ Yes sir.”

“ Well, don’t let me interrupt you, keep right on,” and the Parson fell to work again. The Professor seated himself on a rock and smoked in silence. The Parson wished him elsewhere; for he wanted to be alone. In the course of ten minutes the Professor spoke again.

“ What are you going to do this vacation, Stevens?”

"Dunno sir."

"Haven't you got a school?"

"No sir."

"Where's your home?"

"Haven't any."

"Haven't any home! well hm-hm-hm, I received a letter from the Aroostook yesterday asking me to send a young man to teach school. They'll pay thirty dollars a month and board for three months, and transportation from Bangor as well. It's a tough school of fifty pupils and they want a fellow that can handle it. I guess you're the man. Will you take it?

The Parson straightened up, then staggered. The fields swam before his eyes, his heart almost stopped beating, his breath came in quick gasps. For the last twenty-four hours he had been living his death over and over again. The reaction was awful.

"What's the matter?" asked the Professor looking at him sharply.

"Nothing, nothing sir, I'm a little faint, I didn't eat much breakfast this morning." Then he reached for the watering can and took a good long draught and the world settled back again.

"Oh, all right," said the Professor, "I'll call to see you to-night at your room. Good day." And with a furtive glance at the young man the Professor walked away with head bowed in thought.

The Parson, when he was alone, sat on the edge of the ditch and buried his face in his hands. The reading of the last chapel service he had attended came back to his mind,—"He will watch over thee and keep thee, He will not suffer thy foot to be moved, He that keepeth thee will neither slumber nor sleep." Then he took up his pick and again went to digging ditches.

That night the Professor went to Stevens' room and had a long talk with him.

"Can you take your exams to-morrow and Friday?" he asked.

"Yes sir, I think so," replied the Parson, "but I fear I won't pass."

"What subjects have you?"

"Chemistry under Prof. Aubert, English and French under Prof. Rogers, Physical Geography under you."

"All right, come to me for Physical Geography in the morning. I'll arrange the rest for you. How are you for money?"

The Parson hesitated. "Well, Prof. G—— owes me twenty dollars but it will take all that to square my bills."

"Then square them. I'm going to lend you fifteen dollars, you can pay me when it is convenient."

A great lump rose in the Parson's throat and he swallowed it with difficulty.

"Now," continued the Professor, "here's a ticket to Presque Isle, that was given to me lately. I don't want it so will turn it over to you." It was a regular unlimited ticket stamped at the Orono office and good for seven dollars. The Parson rose from his chair with the ticket in his trembling fingers; the lump rose again in his throat and this time refused to be swallowed. Then the flood gates broke and tears streamed down his cheeks. Little by little the Professor drew the story of the last week's struggle from the young man, and when it was finished he said sternly, "What did you plan this thing for?"

"I could see no other way out of it," was the reply, "and I didn't want to go back to the old life."

The Professor's tone. "Why didn't you tell some one then?"

"I never learned how," said the Parson sadly.

Monday morning as the Parson boarded the north bound train he took a note from his pocket that he had found on his table that morning and read it with streaming eyes. "Exams all clear. Congratulations. Keep a stout heart. You are among friends. Prof. B——."

The train swung swiftly to the northward. The white fields came and went. The snow sifted against the window panes, but the car was warm and comfortable and the young man, with shining eyes, looked out over the moving landscape and murmured, "He that keepeth thee will not slumber nor sleep." The Parson had climbed his second mountain and was looking out over a new world. The undertow had ceased and he was again in quiet water.

LETTERS OF A COLLEGE SENIOR TO HIS YOUNGER BROTHER

BING a series of letters concerning college, written by John Rockwell, a Senior at the University of Maine, to his young brother William, who is to enter college the following autumn.

WITH APOLOGIES TO G. H. L.

ON CHOOSING A COLLEGE

UNIVERSITY OF MAINE,

ORONO, Jan. 15, 1904.

DEAR BILL:—

Please pardon my delay in answering your letter. My time has been all taken up lately in plugging for the finals which come the week after next. Of course you will go to college. Everyone goes to college now-a-days and I am glad you have finally decided to begin next fall. No man ever regrets having taken a college course; but some men often wish they had chosen another college. Choosing your college is an important step and one that requires more thought and deliberation than the majority of boys are inclined to give it. Look the ground over thoroughly before you make up your mind. Every college has its specialties; and it is very necessary that you decide in general *what* you are going to take before you decide *where* you are going to take it. By this I mean that you ought first to know whether you want to be an engineer or a minister.

There are several things that you will do well to consider in making your choice, and let me advise you before I forget it to select a small college. I do not mean that you ought to choose one of the small sectarian

colleges with a small staff of instruction; but I would say choose one of the smaller universities, where the Jew is as good as the Gentile, the Catholic as good as the Protestant, where you can get a broad education and at the same time get in close touch with the men who are probably spending fifteen hours out of the twenty-four in trying to promote your welfare. You can learn more in one year by regarding your instructor as a fellow student who happens to be a good deal farther advanced than you are, than you can in ten years by regarding him as a man with whom you have nothing to do except listen to his lectures.

Some colleges narrow a man where they should broaden him. In one of these a student is treated in some ways as a child who is unable to think for himself and governed by a set of rules touching his daily life and habits. This might be all right in a kindergarten; but when a fellow comes to college he is supposed to have reached the age of understanding. Every college man knows the difference between right and wrong, good and bad; and it is best for him that he be thrown upon his own judgment and conscience when he comes to college, in order that he may learn to think for himself, analyze things as they will affect him personally, and control and govern his own actions. If this is done while he is in college he will be all the more ready to meet the world when he graduates.

You will find that the recitations form about half of your course. Some of the most important lessons are learned without the aid of a text-book and outside the classroom. The ideal college, to my mind, is the one so combining work and recreation that you always feel interested in your lessons or in anything else that may be going on, whether it is musical, athletic, or along some other lines. This may seem like an impossible combination; but I assure you from my experience, that it is not only possible, but it is one of the strong points of this institution.

Do not choose a college because of its gaudy exterior. A servant girl can wear fine looking clothes on three dollars a week, but when her employer seats himself at the table he often wishes that she cooked for somebody else. And the point I wish to make is just this: In choosing a college see that the instructors are good in their respective lines, that the institution itself is built on broad lines, and, perhaps the most important of all, look up

the alumni and see how they compare with those of other institutions.

I enclose catalogue and advise you to get catalogues from at least six other colleges and look them over thoroughly before you decide. When you write again let me know what you think about this.

Most sincerely,

JACK.

ON CHOOSING A COURSE

ORONO, MAINE, February 1, 1904.

DEAR BILL:—

I am mighty glad to hear that you have decided to come here next fall, and I am confident that you will never regret it. Of course I may be prejudiced in favor of Maine; but this is not generally the case with a fellow who has been "stuck" as many times as I have.

You have not yet fully decided what course you will take. That is all right. You of course know, in a general way, what you want to take and it is not at all necessary for you to decide upon your specialty until you have looked the ground over. I don't know that I can give you any advice on that point because I don't know your inclinations in regard to this matter; but I *should* advise you to take something that you like and in which you are interested. As Deacon Pratt used to say, "Some er the boys 'll raise corn and some on 'em 'll raise oats; but I don't see as 't makes any difference as long's they've got ter feed both on 'em ter the stock." I might choose one course and you might choose another, yet each of us could get a living.

There is a foolish idea prevalent among technical and scientific students, that everything not directly connected with their particular branch is entirely useless to them. Everything that a man studies in college should tend toward the broadening of his mind. A man can do little more than develop habit of thought and an ability to reason correctly, in the four short years of a college course. While here you are merely fitting yourself to study the problems of life; and if you would fit yourself thoroughly

you must not confine yourself to the narrow limits of a single course. Political Economy, Logic, History and English are just as valuable to an engineer as to a clergyman; while the mathematics of the engineer are essential only in a lesser degree, to the successful clergyman. In this age of specialties it is necessary to specialize; but do not begin to specialize until you have a thoroughly good general education to begin with.

I understand how hard it is for a fellow with practically no experience and knowledge of the world, to make up his mind as to what he wants to do for a life work. On the whole perhaps it would be better for you to drift around upon the sea of knowledge for a year or so before you make up your mind. In that case you will, at least, be surer of your ground, and by devoting your time to general subjects for a year you will have an opportunity of seeing what you like best.

Glad to hear that you are getting on well in school.

Most sincerely,

JACK.

ON ATHLETICS

ORONO, February 19.

DEAR BILL:—

I am glad that you are so much interested in athletics. The mere athletic instinct is worth a good deal to you even if you never win fame on the diamond or the gridiron; for in all history the athlete has been the leader and conqueror. Athletic Greece surpassed effeminate Persia. Rome in her turn forged ahead of decaying Greece, and while every Roman was a soldier and an athlete her supremacy remained complete. Finally Rome became weak with age and luxury and gave way to the hardy northern tribes, who in their turn have been surpassed by the athletic Anglo-Saxon peoples. America is today the greatest and most athletic nation on the face of the earth; and nowhere will you find the athletic spirit more prominent than in the colleges.

The idea of developing a sound body along with a sound mind is coming more and more into favor each year; and it is generally recognized that

the average healthy boy needs some method of working off his surplus vitality. As an outgrowth of these and other modern conditions, we have baseball, football, track athletics, basketball, tennis, and many other forms of athletics in our colleges, each in its season drawing its circle of votaries and doing its share of good. For two months next fall you will see five hundred men actually loony over football. This thing happens every year and I sincerely believe it to be a healthy condition of affairs. Enthusiasm, spirit, an active interest in whatever is going on, are traits that every man does well to develop. But enough of generalities.

When you come to college get out and try for the football team. If you don't "make" the team, get out in the spring for track or base ball, and repeat this performance each year until you graduate. Some time the college may need you and it is "up to you" to be always ready to respond. If you are never needed to fight the battles of Maine on the athletic field, the four years training will make a new man of you and you will have laid the foundation of a long and healthy life.

Altogether too many men come to college with the idea that they can't do anything in athletics. On the other hand some come with the idea that they can do everything; and these are the kind that only too often fush out like defective fire crackers when they are put to the test. I have seen so many of the latter kind that I have come to distrust the man with a prep. school reputation. Some of them turn out all right, but more often it is the other way; and it has become a part of the athletic policy here to put trust, not so much in the man who comes to us all developed and with a great reputation, as in the man we develop after he comes here by giving him the best coaches that we can secure. I hope that you may not fall into either of the above-named faults.

It takes one season to learn the rudiments of football; and a man can just about learn *how* to run in one year under a good coach. Don't be disappointed, therefore, if your first year doesn't make a prize winner out of you. Keep at it. Whatever you go into, go into it with both feet and your whole heart,— and go to stay.

Sincerely your brother,

JACK.

ON CHOOSING A FRAT

UNIVERSITY OF MAINE

ORONO, March 5, 1904.

DEAR BILL:—

You will probably not be here more than two hours next fall before you are seized upon by some watchful member of the *genus frater*, if I may call it so. You will probably get bids from some of the frats before you have been here very long and it is on this account that I propose to devote this letter to acquainting you with a few things concerning the choice of a frat.

One of the great evils of our "rushing" system here is the haste with which a man is sized up, given a bid and pledged to some fraternity, even before he has become acquainted with a single person outside the particular crowd to which he is pledged. Of course the crowd a man gets in with has a great influence in moulding him and shaping his college career, and in general a man will fall in with his crowd and become like them. But there are not infrequently cases of men who are not able to do this easily, and if one of this kind happens to pledge to the wrong frat he might just as well move out.

In the haste and bustle of the first few days of the college year the freshman is almost wildly excited and elated. He scarcely realizes where he is or what he is doing. He has entered a new world and is lost in wonder and contemplation of all he sees and hears. Perhaps he may be a stranger to everyone as I was when I came to college, and in that case he is still further lost. In this condition he is picked up by some frat man, taken to the house to dinner or in the evening and surrounded by a crowd of fellows who are fresh and gay and jolly—a thoroughly congenial crowd apparently—who put themselves out to please him. Perhaps this happens two or three times, perhaps more, and then he is given a bid. The chances are about nine out of ten that he will accept the first bid; for he longs to be a part of all this jollity, or it may be that he wants companionship and sympathy. This, by the way, is just what I don't want you to do. I believe that it would be better for a man to pledge before coming to

college at all than to jump at an offer while he is still in a trance, as it were.

If a frat holds out a bid to you with the request that you make your decision at once,—decline it with thanks. The crowd that is not willing to stand comparison with others is not the crowd that you want to get in with. All the chapters here are good in their way, but each has a way of its own; and before you pledge to any of them, find out to your own satisfaction that *it's* way is *your* way. Wait until the veneer of newness wears off and see what there is beneath.

The matter of choosing a frat is one of the greatest importance; and a man—the average man—is made or broken by the crowd he gets into. Of course I want you to meet the fellows in my crowd along with the rest; but you need not think that you are under any obligation to them because you are my brother. I naturally think that my frat is the best on earth; you might think otherwise. That is something for you to decide for yourself and all that I shall expect of you is to give us a fair trial. I said before that you would probably have bids, and you probably will, if you don't tell people that you are expecting such a thing to happen. It is well to be wise and still better, at times, to be otherwise.

Now I am not going to warn you against any frat, neither am I going to speak in favor of any of them. You must judge for yourself because in that way alone can you be satisfied. But above all things else, take time.

Sincerely,

JACK.

ON THE "HONOR SYSTEM"

UNIVERSITY OF MAINE,
ORONO, April 15, 1904.

DEAR BILL:—

It's only two weeks more to the Easter Recess and at that time I hope to see you and have a long talk on things relative to college.

Several of my brethren are now utilizing all their spare moments plugging for the arrearage exams at Easter. This suggested to me that it

might be well for me to impose another sermon upon you on the subject of examinations, and particularly the so-called "Honor System."

The subject is of far too much depth for me to do it justice in a letter; for although the thing may seem simple enough at the first glance it becomes more complicated the more it is studied. You know already what it is in the main,—simply placing a man on his honor not to "crib" in an examination, and removing his watcher. The questions arise: Which of man's instincts are the stronger, the good or the bad? What is the effect of vigilance and suspicion on the average man? What is the cause of "cribbing?" How can it be stopped? It would take a volume to answer all these questions thoroughly, and therefore I shall not make the attempt.

I have no doubt that "cribbing" is prevalent in every college in America to a greater or less extent. I know from experience that there is a great deal of it done here at Maine. I have known fellows to "crib" an examination, that I would be willing to trust with all my worldly possessions; and they did it without the slightest qualm of conscience apparently.

Now you will readily see that this thing is not right. When a man "cribs" he is doing himself an injustice both mentally and morally; for he knows that he is doing wrong, no matter how he may seek to justify himself; and if he gets through a subject by "cribbing" his knowledge of that subject is not what it should be. But would it change matters if he were put upon his honor? A man is always upon his honor, and if he will cheat under one system he will do likewise under the other. I will admit, however, that nothing will make a rogue of a man like suspecting him of being such; and it may be that the system of examinations now in vogue here *does* encourage "cribbing" in that way.

But suppose a man comes to his Senior year and happens to get a course under some instructor whom the college has taken a contract to break in. He is likely to have to "crib" in order to graduate. Is he justified in so doing? I shall not presume to answer this question. I am simply citing a case for you to think about.

My opinion of the "Honor System" is this: That it will never stop

"cribbing" as long as men are obliged to "crib" in order to graduate from college in four years. Give a man good instruction and he won't need to "crib." I believe that the correct way to prevent "cribbing," like disease, is to remove the cause.

These are a few random thoughts which you may do well to digest; for in your time the "Honor System" will probably come to Maine. If it comes along with a few good instructors it will undoubtedly be a success, — otherwise, no.

Shall look forward to seeing you at Easter time.

JACK.

VERSE

THE LAW OF THE COLLEGE

*Now this is the Law of the College — as old and as true as the skies ;
And the Student who keeps it shall rue it, and the Student who breaks it
likewise.*

*As the sweep of the two-edged broad-sword the potent Law cutteth both ways,
And the Student who breaks it shall suffer no more than the one who obeys.*

Use horses with discrimination ; ride slowly, but never too slow ;
And remember the night is for plugging, which do — when your horses
won't go.

Keep peace with the Lords of Instruction — Professors, Instructors, and
Prex ;
And trouble not Babbo the Silent, he's cranky and easy to vex.

When a Freshman gets fresh on the Campus, and thinks he needs *all* of
the trail,
The Sophs shall wash *him* in the river, — it shall not be done with a pail.

When Freshmen and Sophomores battle and peanuts are hidden around,
' Tis the duty of Juniors and Seniors to see that the peanuts are found.

The Rule says : Go each day to Chapel, to keep thee from heathenish
ruts —
The Law says : Heed not what the rule says, — take always thy limit
of cuts.

Ye may borrow for midnight consumption each Student a chicken or
hen ;
But remember that owners are watchful and go not again to that pen.

If at night ye feast in the forest on the meat of a borrowed bird,
Be careful to burn all the feathers and take heed ye are not overheard.

Stick-Right is the right of Instructors who know not the Subjects they
teach.

They'll stick you because they can't teach you ; so grin, for it's no use
to preach.

Crib-Right is the right of Delinquents; from all who sit near they may
claim

Whatever may be to them needful, and none shall deny them the same.

Scrap-Right is the right of the Freshman. From any Soph'more he may
claim

A dip in the Stillwater River, and none shall deny him the same.

Because of his wonderful wisdom, because of the strength of his jaw,
In all that the Law leaveth open, the word of the High Muck is Law.

*Now these are the Laws of the College, and few and simple are they ;
If you want to be safe, disregard them ; if not, just try to obey.*

A FRESHMAN

A Freshman is a source of glee
To all the University.
Much cash is his, but little sense ;
He simply oozes innocence
And drips with gullibility.

Green, diffident to a degree,
All gawkishness and gaucherie—
Incarnate unintelligence,
A Freshman is.

Yet when I wooed on bended knee
The maid who holds my heart in fee
And whispered of my love intense,
She said, " You're not my preference—
A Freshman is."

ECHOES OF MIDNIGHT

"Give us a song!" the Sophomores cried
And whacked him on the head;
The Freshman stood on the table, sighed,
And wished that he was dead.

The dark Stillwater, in silent scoff,
Lay grim and threatening there;
The Sophs stood ready to tear him off
And throw him in by the hair.

There was a pause; a Sophomore cried,
"The Peanut Scrap's tomorrow,
O, sing while you may, another day
A hearse you'll have to borrow."

He sang of love and not of fame,
Forgot Nought Seven's glory—
He couldn't sing so very well,
So had to tell a story.

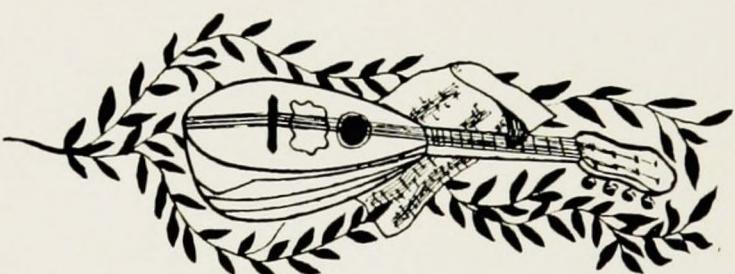

Then voice after voice struck up a yell
Until the awful passion
Uprose like a war-cry, clear and strong,
Their battle-eve's expression.

Poor Fresh! His class he dared not name,
But as the yell grew louder,
Something upon his little cheek
Washed off the "flesh-tint" powder.

And once again the awful yell
Broke out from Sophomore quarters;
They grasped the Fresh and bore him off
To the river's chilly waters.

And darling mamma's eyes are dim
For a singer dumb and gory,
And sweet Bedelia weeps for him
Who tried to tell a story.

Sleep, Freshman, in thy little bed,
Thy wounds and bruises bearing;
The greenest are the cheekiest,
The freshest are the daring.

AFFECTIONATE MEMORIES

Grinnie is gone ; what can be done
To fill his place in college life ?
His smile the hearts of all, has won ;
His presence calms the rising strife.

With chalk in hand and teeth in sight
He gave his prelims to his class;
His questions never did seem right,
With Grinnie one could never pass.

His explanations were so clear,
His averages so low !
And now—oh, what is this I hear,
That Grinnie's got to go ?

Farewell Grinnie ! Peace to you ;
Long have we borne your hellish guile.
Your memory shall continue,
Incarnate, in that graveyard smile.

Still in our dreams we shall behold
A nightmare, thy sweet face,
Until the growth of mental mould
Obliterates its trace.

Your work is done, Alumni One
Shall never see you more.
Farewell ! A long farewell ! Our sun
Has gone forevermore.

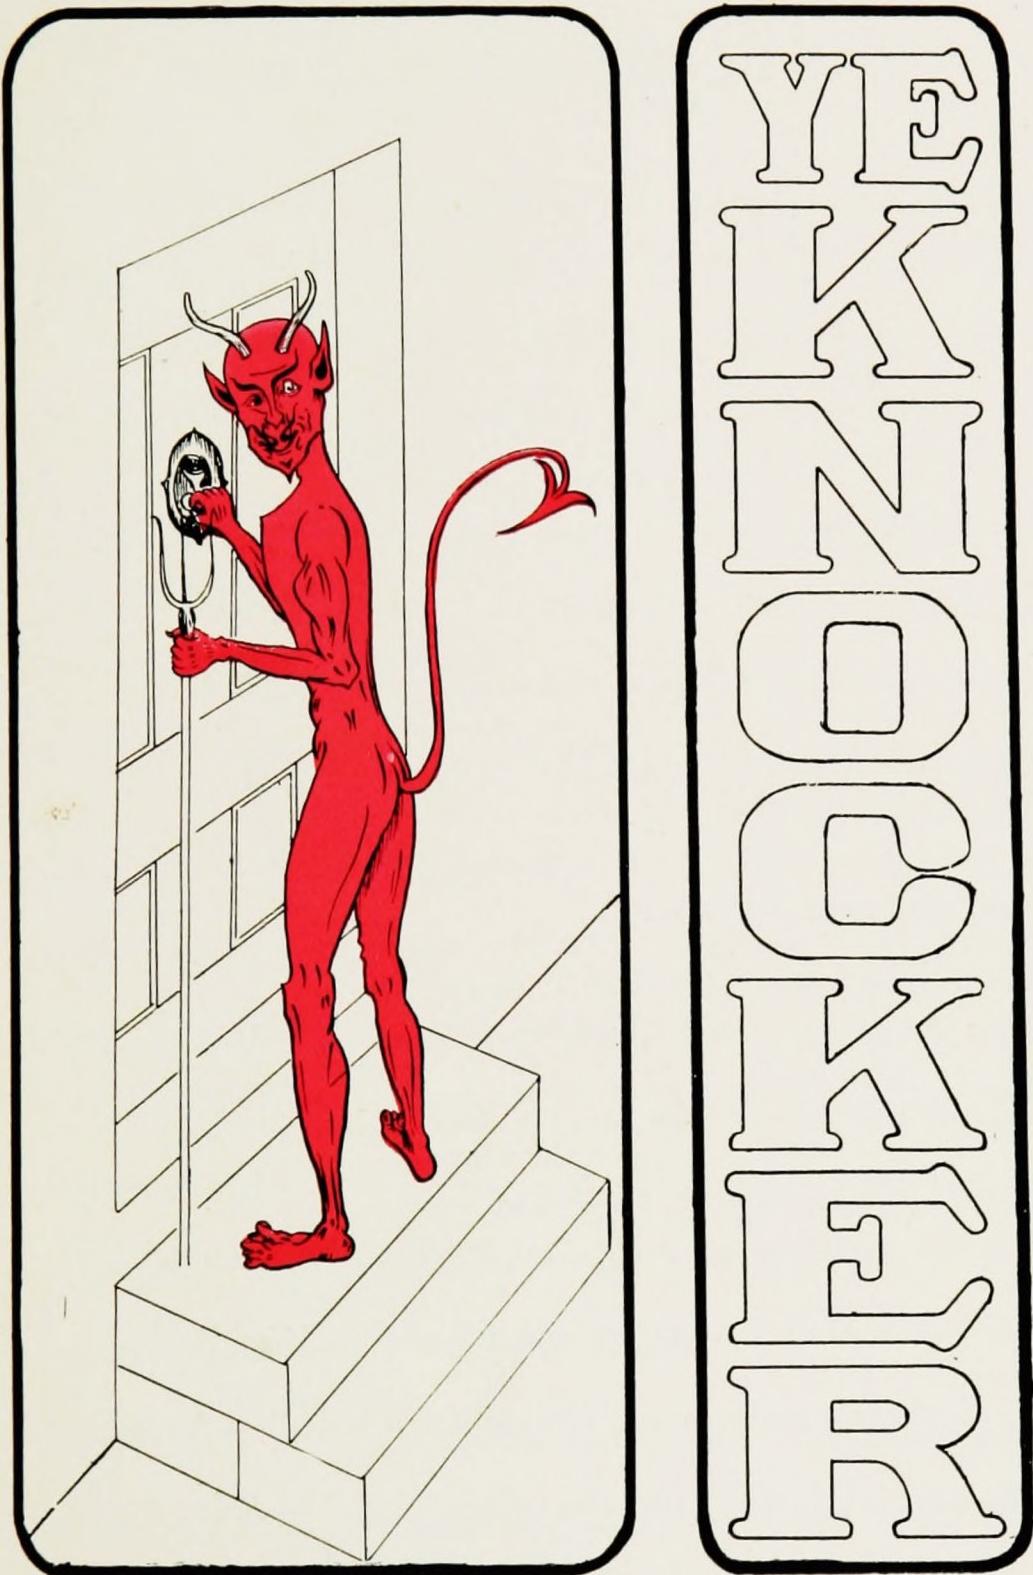

THE SENIOR'S LAMENT

Dedicated with many groans to Babb Webb

Stuck ! Stuck ! Stuck !
In that beastly stuff—A. C.,
And the mail from the office to-day
Brought only the notice to me.

Stuck ! Stuck ! Stuck !
In large letters, seeming alive ;
And the figures that indicate rank
Reduce to a bare fifty-five.

Alas for my time ! It has failed
To ensnare the Goddess of Luck ;
Arrearages fail to console—
I am stuck, stuck, stuck !

APPLIED QUOTATIONS

“How like a mounting devil in the heart
Rules the unreined ambition!” — *Willie Lang.*

“I was a robber, brave and bold.” — *College Book Store.*

“Immodest words admit of no defence,
For lack of modesty is lack of sense.” — *Fat Kingsland.*

“A little, round, fat, oily man of God.” — “*Mark*” *Anthony.*

“Impetuous, insolent, unquenchable.” — *Roy Porter.*

“Cruel as death and hungry as the grave.” — *Babb Webb.*

“Hurrah for the frog that sat in the bog
And solved for this great nation,
A question so vast in times now past
And gave us co-education.”

“We are engaged in a sort of a way
And we truly love each other.” — *Broadwell. Miss Copeland.*

“Gloomy calm of idle vacancy.” — *Gulliver.*

“Smile not again, I pray, but rather weep,
For that would be less sad.” — “*Professor*” *Cummings.*

“For love deceives the best of womankind.” — *Miss Webb.*

“He mouthed a sentence as a cur mouths a bone.” — *Honey.*

“The loud laugh that spoke the vacant mind.” — *Screech Leighton.*

“Oh, wonderous affable!” — *Flynt.*

“Lowering in the confidence of twenty-one.” — *Miss Colcord.*

“The emptiness of ages in his face.” — *Monk.*

“The bashful virgin’s sidelong looks of love.” — *Miss Hodgdon.*

“A gentle boy with soft and silken locks.” — *Cassey, ’06.*

“Have done with childish days.” — *E. O. Sweetser.*

“In his simplicity sublime.” — *Shorty Southard.*

“When he walks along the village street with an independent air,
You can hear them all declare, he must be a millionaire.” —

George Carle.

“The fattest hog in Epicurus’ sty.” — *Babe Woods.*

“She wears her clothes as if they were thrown on with a pitchfork.”
— *Miss Valentine, ’05.*

“His hair just grizzled as in green old age.” — *Sammy Elliott.*

“Misery acquaints a man with strange bedfellows.” — *Oak Hall.*

“A buck of the first head.” — *Stag Trafton.*

“She looks as if butter wouldn’t melt in her mouth.” — *Miss Stone.*

“She’s neither fish, nor flesh, nor good red herring.” — *Miss Knights.*

“For every inch that is not fool is rogue.” — *R. H. Alton.*

“That old man eloquent.” — *Doctor Fernald.*

“Who thinks too little and who talks too much.” — *Willie Co-ed.*

“I am resolved to grow fat and look young till forty.” — *Doc Lewis.*

“The lunatic, the lover, and the poet.”—
Beet Ames, Bachelder, '05, and Shorty Southard.

“Who woo'd in haste and means to wed at leisure.”—*Micky Conner.*

“Love me little, love me long.”—*Miss Aiken.*

“I dote on his very absence.”—*Grinny Lambert.*

“I am not in the roll of common men.”—*Soderstrom.*

“Exceedingly well re(a)d.”—*Bowen.*

And moonstruck madness.”—*Snell.*

“My Clay with long oblivion is gone dry,
But fill me with the old familiar Juice,
Methinks I might recover bye and bye.”—*Tommy Herbert.*

“I live an idle burden to the ground.”—*Willie Giles.*

“I am but the gatherer and disposer of other men's stuff.”—
College Store.

“Going as if he trod upon eggs.”—*Sergeant Sweet on Parade.*

“They do not live but linger.”—*Boarders at the Commons.*

“Marriage is a desperate thing.”—*Archie Grover.*

“A liar should have a good memory.”—*French, '04.*

“For if a man thinketh himself something when he is nothing, he deceiveth himself.”—*Reddy Edson.*

“Leave it to me. I’m a wise Guy.”—*Willie Giles.*

“How long, O Lord! How long!”—*Shorty Southard.*

“It is great folly to wish only to be wise.”—*John Olivenbaum.*

“There is no disguise that can long hide love where it exists.”

—*Freshman Bird.*

“Nothing is given so profusely as advice.”—*Doc. Lewis.*

“The true way to be deceived is to think one’s self more knowing than others.”—*A. R. Small.*

“We are never so ridiculous from the habits we have as from those that we affect to have.”—*C. E. Currier.*

“Great men should not have great faults.”—*Prex.*

“There are men of whom we can never believe evil without having seen it.”—*Abbott, ’05.*

“The desire to appear clever often prevents our being so.”

—*Reddy Edson.*

“Youth is a continual intoxication.”—*Shorty Lunt.*

“I’m the Governor of Gray.”—*C. E. Caswell.*

“Affected simplicity is refined imposture.”—*Bubby Paine.*

“The extreme delight we take in talking of ourselves should warn us that it is not shared by those who listen.”—*Roy Porter.*

“Never let studies interfere with your regular college course.”

—*George Carle.*

MOTHER GOOSE RHYMES

(Edited by Cal C —, and especially adapted to the needs of freshman co-eds.)

Dickery Dickery Dock,
A Mouse ran up the clock;
The Clock Struck Two and Broadwell Flew,
Dickery Dickery Dock.

When I was a Freshman
And boarded at the “Coop,”
Spring nights the boys would come
To sit upon our stoop.
Now I am a Junior
And ask him in to tea,
All the Freshman Co-eds
Look enviously on me.

Sing a song of sixpence,
Miss Wentworth needs a rattle;
She “queers” herself with everyone
By her silly, childish prattle.

There was a worthy matron,
A lady tried and true,
Her children were so giddy
She didn’t know what to do.
They sang and danced so late at night
And made so loud a noise,
She had to build a wire fence
To keep away the boys.

Hey Diddle Diddle,
A boy plays the fiddle,
 In a frat house over the way;
The passers-by smile
And loiter awhile
 To watch the Co-eds at their play.

There was a pretty Co-ed
Who bought a lot of books,
 She said that she would study if she could;
But she registered to "Honey,"
She thought he looked so funny,
 That she doesn't even study when she should.

Freshman Miss Webb is out of her head,
 She's carried away with dancing;
The extract of ice, applied once or twice,
 Will stop the disease from advancing.

PRISM PICTURE GALLERY

This little man upon the horse,
Who looks like h-l-l or something worse,
Is K. B. Porter, wild and young ;
His warlike exploits should be sung
By bards more worthy to rehearse.

That's Breed—the man with the book—
Who rises to have one more look.

To assure himself well
Who is cutting chapel,
He'll neck 'till his neck has
a crook.

"A horse is a vain thing for safety,"
So Willie disposed of his horse,—
Adopted a mule to take him through school—
That smile shows he suffered no loss.

All hail the craft of Freshman Toner,
Who with the ladies was a winner!

To soften the pat
Of the Sophomore slat,
He stuffed his pants like a prize
bologna.

Here's Archer N. Brown, the gossoon;
Some think he's been touched by the moon.
When he lets out a bray, all others give way,
For that laugh would phase a baboon.

Great Breed upon the football field
Strides grandly to and fro.

When ordered off the
sidelines

He answers: "I guess
no,

I am a Senior, Mr.
Carle."

"That don't make
any case,
Get off the field."

But Breed refused,
And this is what took
place.

This is a rear view of Pat Weymouth and a friend of his going home from one of the gym. dances. No, they have not had a falling out, that is simply their way. They believe in the long distance kind you know; or else it may be that Pat is bashful. Isn't it painful?

O, Grinnie Lambert, te-he-he! of great and glorious memory,
Once had a mill and into it he put his class in Analyt.

Two openings were there to this mill from which the wretched class might spill;
One was the opening labeled "stuck," the other one was called "mere luck."

So Grinnie turned and all the while his face was covered with a smile;
For through the first named opening there came a satisfying string.

Grinne - Ah! Some has slipped out. That must not happen again. Hettie!

PUZZLE—FIND GRUNTER.

Then all at once that smile grew grave,
For through "mere luck" one came forth safe.
So Grinnie took a firmer grip,
Resolved that none should further slip;
And in the course of all that year
No other man could get through clear.
And Grinnie smiled in child-
ish glee
And softly giggled: Te-he-he!

A Football Hero! Hoch! Oh, Hoch!
Let others to oblivion sink!
To see him now you'd never think
That this is how he used to look.

APPLIED SONGS

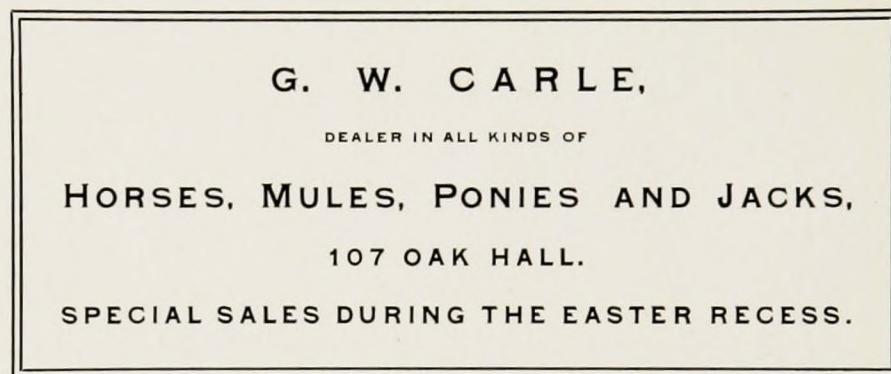

“The Gay Cadet,”	John Quimby
“Josephine, My Jo,”	Willie Trask
“Bedelia,”	Pete Bean
“They Were All Doing the Same,”	In Mechanics
“’Tis Best to Forgive and Forget,”	Tommy Herbert

NOTICE.

Be it known by each and every society connected with the University of Maine that me and my wife are candidates for all receiving committees and that we shall consider ourselves greatly slighted unless we are asked to serve on every one.

(The above was sent to the PRISM unsigned. Any information as to who is meant will be gladly received. *All notices should be signed.*)

BUSINESS CARD.

THE WICKED PUNSTER.

RUNT (before the Musical Committee): If we come out behind they dock the members of the clubs to pay the deficit.

GOAT (smiling): A kind of dock-you-men-tary proceeding.

SUBJECT FOR THEME TO BE HANDED IN MARCH 11, 1904:—

“Charlie Wood’s Stenographer and Two-Step Reddy: or Love’s Terpsichorean.”

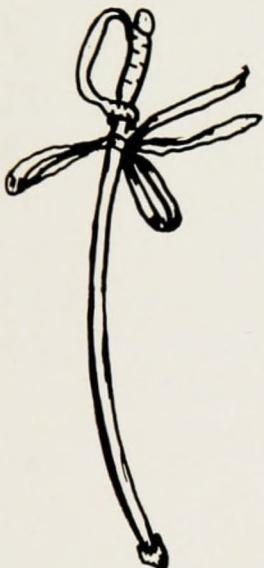

DOC THATCHER (as he looked at the moon through the telescope at “Janie’s Round House.”) Say, Mr. Lambert, is that story true about the man in the moon? Is that him I see up there now?

GRINNY (with an unusually loud smile): Oh, no, Mr. Thatcher, I guess that is only a story. You must have a vision, — he-he.

RECENT ADDITIONS TO THE UNIVERSITY MUSEUM

No. 479-X. Three choice gold bricks from the collection of Obediah Mitchell of Newfields, Maine. Obediah secured these while on his famous trip to Boston. They are very valuable and are on exhibition for a limited time only.

No. 480-XX. United States Army sword found near the Mount Vernon House, Orono, Maine, while excavations were being made for a tennis court. Inscribed "E. S. B." Supposed to have belonged to Major Edwin Sherman Broadwell, who died in defence of co-education.

No. 482-X. A circular band of Carnegie steel once used as a hoop for the head of Reddy Edson. Owing to a continued swelling of that member the band became ruptured, with serious damage to Reddy, who brought suit against the Carnegie Steel Company to recover damages for the loss of his brains. The case was non-suited on the ground that Reddy never had any brains, and that the swelling was caused by a rush of blood to the head, produced by the smile of a woman. This relic is preserved as a souvenir of the most remarkable case on record.

No. 490-X

No. 490-X. This pair of double-jointed, steel-ribbed, kangaroo-shaped, number thirty-two and a half corsets, is exhibited by Captain Fifield. They are warranted to give just the proper military figure, to prevent curvature of the spine and win the uncontrollable admiration of all things feminine.

No. 1000-X¹

No. 1000-X. This elaborate gewgaw was taken from the ear of a dead cannibal on one of the South Sea Islands by Count Guerris Bismarck de Boulogna de Coligny. The Count has since worn it for a watch fob, but finally decided to place it on exhibition. It is miraculously and beautifully made of a copper cent, a piece of hay wire, and a junk of lead.

No. 1001. A valuable collection of manuscripts, including Babe Woods' prayer and the seven-by-nine envelope in which it was kept, a number of Runt Everett's examination papers, several of Jim Sawyer's uncancelled notifications, a copy of a speech of Prexy Fellows given before the Grangers of Squashville, a copy of the valedictory address of Doc Lewis to the Executive Committee of the Athletic Association, and the "Life of Ginny Lambert" in three outbursts.

**THE CONSTITUTION SAVED
A TRAGEDY IN ONE EXPLOSION.**

SCENE: Allie's recitation room on third floor of Coburn Hall.

TIME: 8-45 A. M., March 30, 1904.

The Constitution is under discussion.

ALLIE: And now Mr. Anthony, Section 9, Clause 5—"No tax or duty—"

ANTHONY (hesitates): I guess I don't know that Professor, (Sits down much dejected).

A HALF HOUR LATER.

ALLIE: Mr. Totman, Section 10, Clause 1—"No State shall enter—" Totman makes several shrewd guesses and finally Allie repeats the whole Article and says, "That's very well Mr. Totman." Totman sits down.

ANTHONY (in a loud voice): I can give that one Professor.

ALLIE: All right Mr. Anthony, get up and give it.

A breathless hush falls on the class as Anthony rises:

ANTHONY: "'No State shall issue obligations of contracts'—er no that ain't right—'No State shall make anything but gold and silver—'"

Here Allie rises to defend our beloved Constitution from further mutilation.

ANTHONY (meekly): Won't you start me on that Professor?

Anthony repeats after Allie the whole Article, after which Allie says, "That's very well Mr. Anthony," and Anthony sits down. (Loud and prolonged applause.)

THINGS WE WOULD LIKE TO KNOW OF THE FRESHMEN.

Why Dickenson keeps his hair cut?

When Schoppe will pay young Sampson that quarter?

When Farnsworth will get over his swelled head?

Why McKenzie ever came to college and when he will wipe off that smile?

When Maxwell will be the sport he thinks he is?

Who cut Dickenson's hair?

Who is Bert Foss and does he really come from New York?

When Robinson will stop thinking that he runs Oak Hall?

When Flanagan will take a bath and get a haircut.

Vanitas vanitorum
This is a cross section of Shorty Southard in his new plug hat.

WHEN THERE ARE THREE.

PROF. (?) EDSON (in English): What is Bigamy!

Wise Freshman: Having two wives at the same time.

EDSON: Correct. Now what is it called when a man has three?

SOPHOMORE (Who has been stuck in Eh 4): Trigonometry.

EXTRACT FROM ILLUSTRATED LECTURE OF DR. LEWIS.

"Here we have a dog-fight between two men."

SAYINGS OF SEGALL.

"Zey know not how to mix ze cocktail here in Bangor."

"Vat makes you tink you know anyting, Meester Devereaux, ven you don't!"

A MIGHTY LARGE ONE.

PROF. HART (in Astronomy): Well, Mr. Berry, how far is it from here to the moon?

BERRY: Eight hundred miles and a fraction.

JANIE (smiles): A-h well, that would have to be a pretty large fraction, Mr. Berry.

DOUBLE JOINTED.

JIMMIE (in Physics): Mr. Dolbier, what is the Larynx?

DOLBIER (very promptly): The Larynx is a musical box made by God and placed in the middle of a man's neck.

JIMMIE: Correct — very good — ahem — ahem — Do women have them?

DOLBIER: No sir, I think not. I never saw one on any of the women over to "Prexie's," but I think he must have a double jointed one.

HEARD AT THE LAW SCHOOL.

PROF. L.— : But, Mr. Wall, that is not a correct statement of the law.

WALL: Oh well, that's only a hypothesis of mine.

PROF. ROGERS: This policy is contrary to *bones mores*.

LITTLEFIELD: Who is that man Brown?

A QUERY: When will German be a requirement for entrance to the School of Law?

ANSWER: When all the instructors no longer speak English.

BROWN: I think the Assembly ought to buy the presiding officer a gavel.

CLOUGH: He wants you to buy a gavel now so that he will be the first President to wear it upon his shoulders.

HOW GEORGE DOES IT.

BOARDY (confidentially): There's only one man in college that can pull my leg, and that's George Carle. While I'm getting on to him pulling one leg he'll reach around and pull the other.

AND NOW THEY CALL HIM QUEERER EVERY DAY.

BEALE: What does that Q. E. D. mean?

JEWETT: Why, *quod erat demonstrandum*, — which was to be demonstrated.

BEALE: Oh, I thought it meant quite easily decided, and I was just going to say 'taint so.

LEVITY IN THE HIGH PLACES.

WILLIE HAYNES (explaining the cause of his absence to Prex): That time the car was off the track.

PREX: Do you live in Bangor, Mr. Haynes?

WILLIE: O, no, I live at the Beta House.

PREX: Well, Mr. Haynes, at what point between the Beta House and your recitation room did the car go off the track?

On the evening of March 11, 1904, the freshmen co-eds held their "Prom" at the hen house. The events of the evening were the "butting in" of several sophomores and the gallant rescue of the "Widder" Jones, a sophomore, who had been locked in her room by the freshmen. The accompanying sketch was made on the spot by our special artist, and shows the "Widder" falling into the arms of Charlie Campbell, who exposes himself to a galling fire of chewing gum and bad names; and, with the assistance of a ladder, brings his classmate safely to the ground.

ing into the arms of Charlie Campbell, who exposes himself to a galling fire of chewing gum and bad names; and, with the assistance of a ladder, brings his classmate safely to the ground.

Yes, he no doubt has his peculiarities and no doubt he did chew the end of his ventilator rope. He was probably hungry. Moreover, it was his own recitation room and he had a right to eat the whole rope if he wanted to.

No, Allie never sticks anybody. He never needs to. When a fellow gets through a course under Allie he knows enough about it to pass an exam.

Popular! Well, I should say yes!

The Grand Old Man.— Abbott, '05.

Insoluble Carbonates.— *The "grub" at the Commons.*

THE W. C. Z. T. U. PRIZE SPEAKING CONTEST.

This is a contest held at Veazie on the evening after Maine has defeated Bowdoin at football. The aim is to show by precept and (horrible) example, the beneficial effects of the Prohibition Law. This year three prizes were awarded, the points considered being general character, lung power and knowledge of subject.

1st Prize: One full-length portrait of Thomas Napoleon Shimo Young, the eminent philanthropist.

2nd Prize: One volume of that celebrated socialistic treatise, "My Method of Picking Up Chips," by Everett M. Breed.

3rd Prize: One antique stone jug of great historical value, once used by the "Grangers."

PROGRAM.

Oration, Whiskey wow, wow, wow,	" Jimjam Olivenbaum
Description, That dark brown taste,	" Highball " Churchill
Music, Down where the Wurzburger flows,	Chorus
Reading, Budweiser—an idyl of the springtime,	E. Shag Trafton
Poem, The Morning After,	" Seedy " Smith
Oration, The juice of the grape,	Howard Anheuser Stanley
Music, Drink to dear old Maine,	Chorus
Discussion, Tanglefoot—its modern significance,	" Cocktail " Moody
Discussion, The disintegrating power of Prohibition Whiskey,	" Boozer " Averill
Music, Champagne Charlie,	Chorus
Closing Whoop	

THE BATTER.

PROF. BOARDMAN: Mr. Little, what is the Batter of a Wall?

LITTLE (hesitates): Oh, it's the thin mortar put in between the bricks.

H. A. THOMAS (in Mechanics): Three fourths of a ton equals six hundred feet.

The Elastic Limit.—*Breed's Neck.*

Before Treatment.

Three Weeks Later.

All persons who have need of the services of a chiropodist should carefully notice the above. This shows an almost miraculous cure on what everybody supposed to be a hopeless case. Ten per cent. discount to students.

PEALIE'S TRIP TO BOSTON—THE FIRST SIGHT OF THE L-ROAD.

On November 19, a large number of seniors who are taking mechanical and electrical engineering will start on a trip to Massachusetts to visit the leading electrical and mechanical construction companies in that state under the guidance of Prof. Walker.—*Campus*.

THE MODERN FABLE OF FAT, THE WILLING INFORMER

BY GEORGE UNAIDED.

Recently there came to this Temple of Knowledge a Wise Gazook named Fat. He blew in from a little town in the Green Hills with an I Be It smile and a powerful Wind Instrument. We took him for the Main Shaft. Fat's chief asset was a Line of Talk calculated to be Just Right. He has a Swell Front also; and as a Piemonger he has Obediah Tubbs Skinned clean. He camps out in the kitchen hashing up Thanksgiving dishes like those in the Ladies Home Journal. These are the kind he ate Up Thayer. At the same time he does a Hug at the doughnut jar with his left Fore Quarter while he feeds up the Juicy Slugs with his Right Mitt.

Fat is generally busy trying to make the Common Folks think that he has reached the Ladder of Learning by a Short Cut and got a death grip on the top round. The Common Folks don't take the hook, though, and then Fat begins to make things plain. At Mess he is certainly the Main Squeeze. His hungry orbs soon size up the Chaw and then it is All In. The Common Folks go hungry but Fat don't care. Everybody excuses Fat though, for these things, because they know he's the Works and occupies a Place in the Landscape.

Moral: If you have any Superfluous Gray Matter nurse it; but when you eat doughnuts don't Hog it.

THE FRESHMAN PROM — A MODERN EPIC

BY MISS M. ANNETTE STEIN

The festive "Coop," Mount Vernon Hall,
Has witnessed scenes both great and small.
And world-wide interests there have been
Discussed at length in the Freshman "Pen."

The Junior Prom and Sophomore scraps
Had equal place with war with Japs.
While talking of Prom and gay Sophomore
Those giddy Freshmen got slightly sore.

To go to the Prom they were not bid.
They couldn't have one of their own—but they did.
Of Freshmen co-eds there were eight,
And each Fresh girl must have a mate.

Ought seven boys they invited there,
But not of the Sophomores unaware.
Ought six felt it brewing in the air,
But what—but how—but when—but where?

The "when" was easiest to decide.
Should they go to the Junior or let it slide?
A dozen *did* go, I hear that was all,
The rest stayed behind guarding Mt. Vernon Hall.

(A long breath should be taken here.)

Inside the house one Sophomore
The Freshmen shut up and locked the door.
That Sophomore—she was a spunky lass—
Tied up some sheets and turned out the gas

And out of the window prepared to slip
When on the wall Charlie's ladder did tip,
And her classmates appeared to aid her flight
And help her out of her sorrowful plight.

Meanwhile a daring Freshman came,
I wish I dared to tell his name,
And after that three Freshmen more
Came rapping at our kitchen door.

The former past these Sophomores walked,
The others in coming were not blocked;
For at the "Kappa's" they left the car,
Went through that house. Ha ha! ha ha!

Then to the "Coop" they came in haste,
They surely had no time to waste.
From an upper window we plainly heard
The Sophomores saying, "Where went that Bird?"

Other things too we heard them say,
Such as "Let's go bluff them if we may,"
And they bluffed away with right good will;
We cut the bell wire to keep it still.

The first waltz meantime was going on,
While the Sophs became subjects of scorn;
And didn't that Soph feel rather queer
When he heard, "Didn't get in did you Sammy dear?"

They changed their tactics, climbed up high,
To go through windows they did try;
One Soph was assisted from within
And got some love pats on his chin.

Then darkness reigned o'er the room supreme;
It surely seemed like a dream.

A dream it was to the Sophomore, shocked,
When he got to the door and found it locked.

Out of the window he went again,
And to the veranda the Sophs went then;
And struggling at the windows there
Till the matron called from off the stair:

"Let them come in, if come they must,
Before they all the windows bust."
And at the word the "crowd" adjourned
And to the dreamiest music turned.

The Sophs from window and garret came,
Their faces beaming o'er with shame.
They'd entered the house, they'd reached one goal,
The daring "Widder" was landed whole

And without any damage in her home,
And free she was to make her roam.
They danced to our music, turned over our chairs,
'Till the matron kicked them all down stairs.

And thence goes homeward through the door
And pledges his word — each Sophomore,
To leave alone each Freshman man
To enjoy his dance as best he can.

The so-called "Coop" must close at ten,
The Freshman boys must go home then;
The Sophomores went down like sheep,
Hardly one opened his mouth to peep.

But one, however, took his chance
To stop a Freshman in his dance
And warn him sternly that what he did
Was by the Sophomore class forbid.

That Freshman stood with scornful face,
And as he stepped back to his place,
He said as the Soph went through the door,
"I've heard all this some time before."

Wise Freshman!

One thing the Sophomores must have forgot,
That which we expected—they did it not.
They didn't break up our Prom at all,
They simply came and made us a call.

Let's to the Sophomore give his due,
He gave his word and kept it, too.
He came next day and made repair,
But now of the Sophomore—BEWARE!

A Forgotten Maine Humorist.—*Honey.*

HE KNOWS.

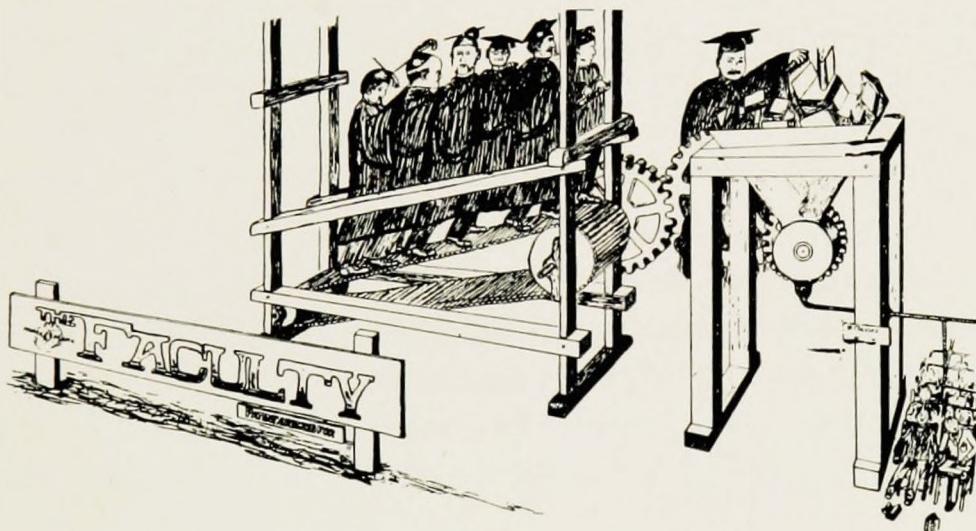

PROF. BRADLEY of Wesleyan (Lecturing on Liquid Air): Here I have some 99% alcohol which I was forced to bring all the way from Middletown. It is the real thing I assure you; if you don't believe me I refer you to Prof. Woods. He's been there and he knows.

ROY'S FIRST FREEZE.

PORTER, '06: Now my dear G——, I know by the way you tremble that you are almost frozen and I insist upon it that you put on my coat.

MISS C—(very pleasantly): Well, Mr. Porter, if you insist I shall have to permit it, but—er—I guess—er—you needn't bother to hold it on, thank you.

PREXY'S DREAM—A STUDY.

A NEW WORD.

GRUNTER BAILEY: You fellows ought to spend your money more *discretely*.

AND PEALEY FAINTED.

E. M. BREED (imperiously and scornfully): But you must remember, Prof. Walker, that we are dealing with air, not steam.

FRESHMAN FLANAGAN—HIS STATEMENT.

I am a prehistoric personification of beauty exemplified.

A GREAT THOUGHT.

PREX (in chapel): I think each of you ought to put one or two meals into the hat.

AND EVERYBODY WOKE UP.

PROF. FERNALD: What would the word ‘swallow’ first suggest to an ornithologist?

H. S. TAYLOR: I don’t know unless it would be something to drink.

The Shade of Lewis Siff — *Moon-eyed Arana*.

The New Woman — *Freshman Reynolds*.

HORRIBLE HARVEY IN THE BACKWOODS

A Sequel to “Horrible Harvey at College”

BY J. H. McCCLURE.

I was tired from study and I knew that I could not find the needed rest at home in the city during the holidays. On this account, I packed a few of the necessities of life and, shaking the bustle and turmoil of the business world, went to visit a friend, Edward Upton, in Gloucester County, New Brunswick. Ned easily guessed the purpose of my visit and two days after my arrival we started up the Big Tracadie river bound for his camps.

We arrived without incident and, with the exception of a cave-in of a part of the roof, caused by the snow, we found everything intact. For a week we enjoyed our lazy, hermit life, spending a good deal of our time in making up for lost sleep. On the eighth day, however, trouble came.

We arose early and, taking our rifles and a meagre lunch, headed up the river to a place where there was likely to be a deer yard. Our supposition proved incorrect, so, agreeing to meet Ned at this place at twelve o’clock, I went off on my own hook. About an hour after our parting I heard a crashing in the undergrowth ahead of me. The sound seemed to be coming

nearer, so I stepped behind a large beech tree. Moments seemed hours as I stood with my rifle at my shoulder ready to draw my bead. Suddenly, out from behind a dense clump of firs came a Horwable mouse. All discretion seemed to abandon me, for instead of waiting for a nearer shot, I fired. The next thing I knew the mouse was charging on me like an enraged bull. I broke down the lever of my rifle, but something went wrong and the cartridge jammed. I pumped the lever, but in vain. My safety lay in my agility and my agility was not lacking, for in less time than it takes to tell it I was in the very top of the beech tree under which I had been standing.

The mouse came on and first vented his fury on my rifle, smashing it to splinters with his feet. Then he turned his attention to me. Rearing up on his hind legs he cleaved off a branch as large as my arm with one of his fore feet and as neatly as if it had been done by a single blow of an axe. Four leaves fell from the tree as a result of the bellowing that followed. Finding that he couldn't reach me he drew back and, like an enormous ram, butted the trunk again and again, shaking the tree so that it was with difficulty that I kept my perch.

For four hours I sat there and looked him calmly in the eye, and finally quelled by my gaze, he trotted off in the direction whence he came. It was not until he had been gone ten minutes that I dared to come down and start post-haste for our meeting place. There I found Ned smoking his pipe and waiting for me. He had not heard the report of my gun, else he would have been worried at my absence. Whether or not I hit the mouse is a question I am unable to answer, for I was in too much of a hurry to get out of the locality to look for signs of blood.

Three days more were passed in idleness at camp and then we returned, Ned to his home, and I to college. For my part, with the exception of a cold contracted in the tree, I felt rested and refreshed and more capable of preparing for my mid-year examinations.

A remarkable experience, thrilling in the extreme, and well told. Have you not misspelled the word "moose?"—Eby.

What Houses are These?

These Are the Phi Gamma Delta House and the Coop.

Who Are the People in the Windows?

The People Are H. A. Stanley and the Widder Jones.

What are they doing?

They Are Flirting, the Naughty Things.

Do They Flirt Often?

Yes, H. A. is a Great Flirt and the Widder is Very Affectionate.

The Tragic Inci-
dent of the Legisla-
tor Who Investigated
the Shower Baths in
Alumni Hall, and
Pronounced them No
Good.

IMPORTANT EVENTS OF THE YEAR

September 19, Father Whipple returns to college after an absence of twenty years.

September 20, Reddy Edson arrives from Portland and the temperature rises three degrees in twenty minutes.

September 23, Lincoln Crowell is washed in the Stillwater.

October 1, Babb Webb seen without his toothpick.

October 9, Flab Bird seen on the Campus.

October 14, Prex saves one cent on a yeast cake.

November 29, Johnnie Perry disappears and all flags are displayed at half mast.

December 8, Capt. A. R. Small's birthday party in Oldtown.

January 1, Tommy Herbert decides to cut it out.

January 27, George Carle gets out on ninety in Mechanics.

February 1, H. O. Beale starts in the scalping business on the B. O & O.

February 3, Double trading stamps given at the College Book Store.

February 14, University Hall burns. Sandy Dinsmore awarded a medal for conspicuous gallantry.

February 15, Doc Lewis resigns from the athletic committee.

February 22, Prex poses for his portrait.

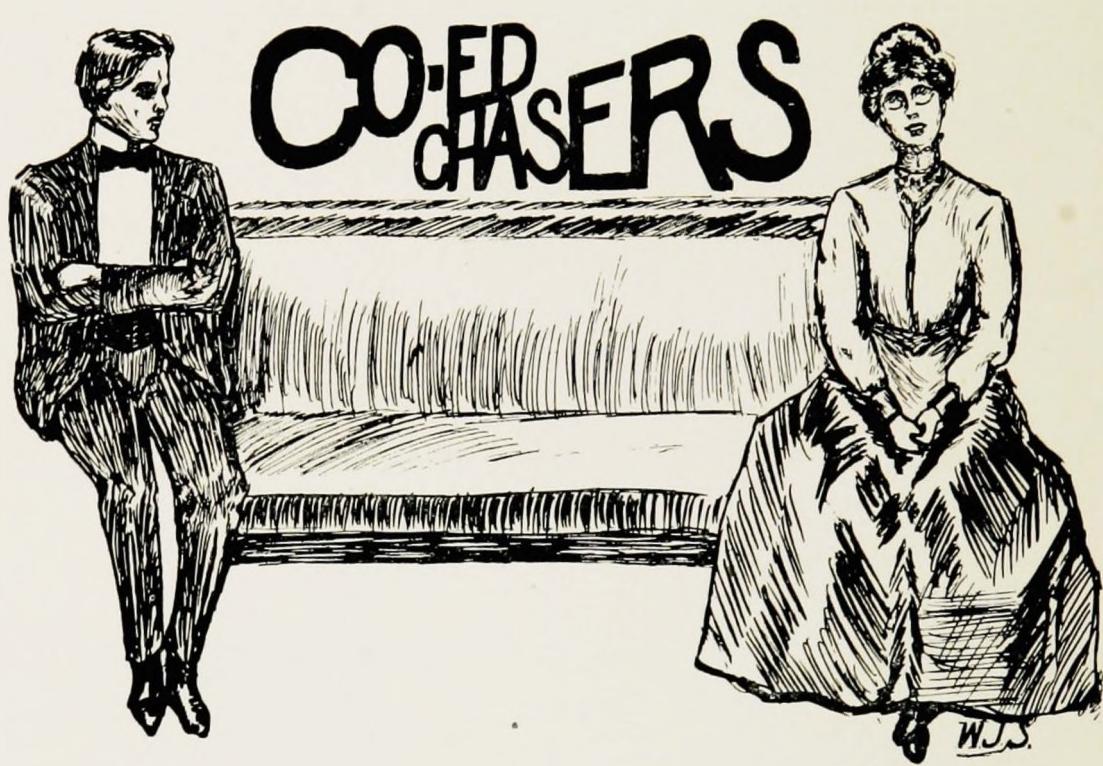

March 2, Ginny Lambert kisses himself goodbye.

March 13, Roy Sands returns from a very successful three days' Fox hunt in Bangor.

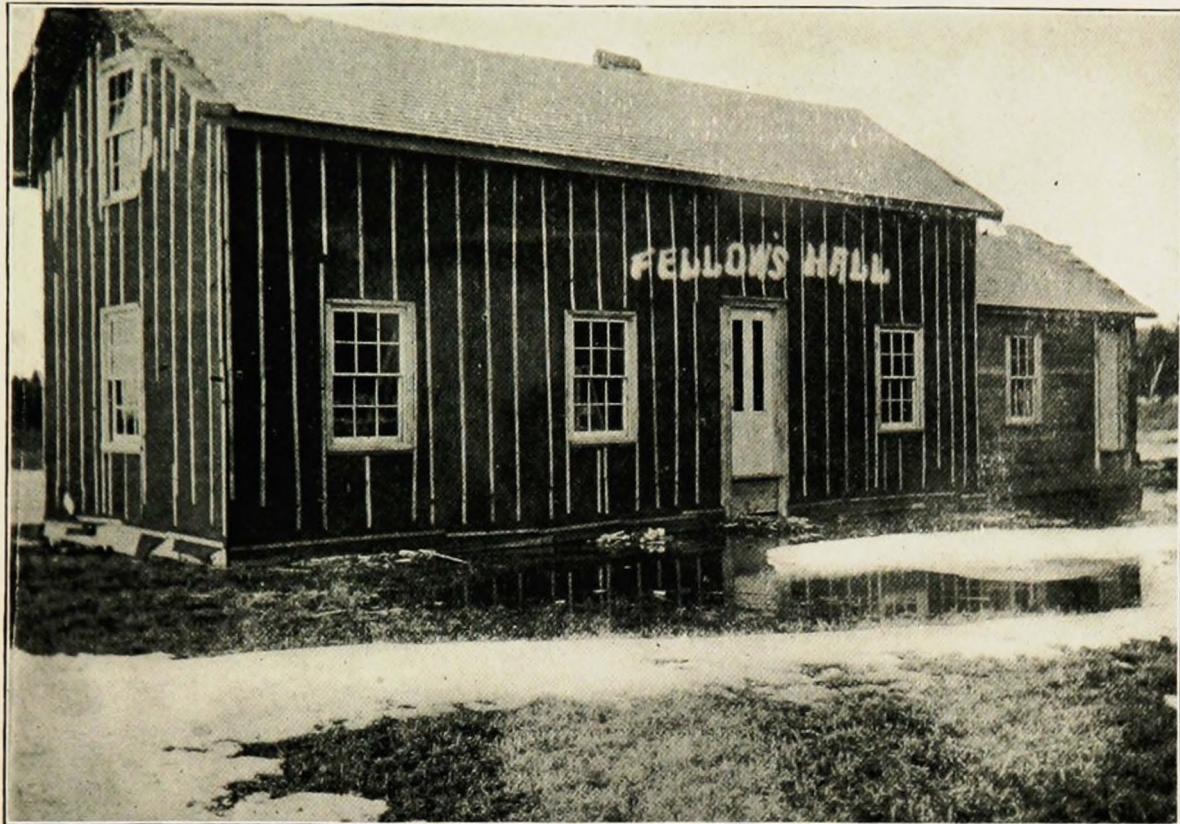

March 27, Janie and the Freshmen have a little scrap after chapel.

April 11, Bradford calls on "Sweet Sixteen" in Oldtown and poses as a freshman.

April 12, The PRISM goes to press.

"WILLIE."

ONE OF OUR MOST IMPOSING BUILDINGS

AND EXPLANATIONS FOLLOWED.

REDDY EDSON: Good evening Miss Parker, I want to take a few lessons in dancing in order to perfect myself for the Prom.—This is my first year you know.

MISS PARKER: Why, they don't allow Freshmen at the Prom.

“ PROFESSOR ” CONNER.

PREX: The committee is made up as follows,—Professors Munson, Huddilston and Conner.

MENTAL SUGGESTION.

ALLIE (in Constitution): And now we come to that great long Article,—er Mr. Southard.

THE POSITION OF A SOLDIER, ILLUSTRATED
BY CAPTAIN A. R. SMALL.

Head erect; chest expanded; eyes to the front; heels together; feet apart at an angle of forty-five degrees; stomach in; legs straight without stiffness.

CHARACTERISTIC.

Q. E. D. BEALE: How is your voice to-night, Miss H—?

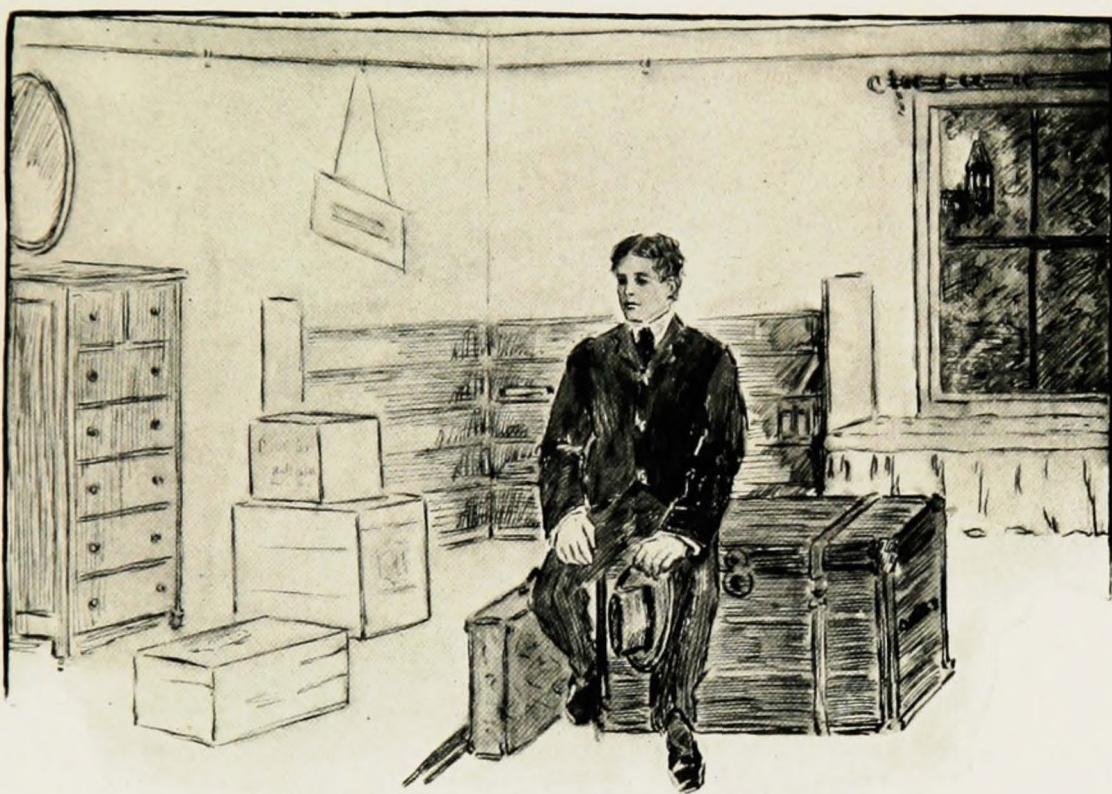

MISS H—: Very well, thank you.

BEALE: Can you Crowe?

KARL'S FIRST PRAYER.

PROF. FERNALD: What did Martin Luther say when called before the "Diet of Worms," charged with slandering the Catholic Church?

KARL PORTER (rises slowly with puzzled expression): "Here I stand—I cannot do otherwise—God help me—Amen."

THE END

THE GLENWOOD WATER HEATER

ORONO, MAINE, April 5, 1903.

Weir Stove Company, Taunton, Mass.,

Gentlemen:—The Glenwood Hot Water Heater which I have in my dwelling has been in use since the first of December with the utmost satisfaction. We heat a building some 50x25 feet from top to bottom with this machine, the fire pot of which is, I believe, 20 inches in diameter. We run it with drafts closed most of the time, and a small amount of nut coal is sufficient to keep our house in a comfortable temperature during the entire twenty-four hours. I regard the heater as very economical of fuel and easy to manage, and extremely clean.

Yours truly,

G. M. GOWELL.

RESOLVED,

that, having made a personal investigation among the up-to-date clothiers in this vicinity, the students of the University of Maine hereby agree and declare that Benoit's is the best place to buy wearing apparel, not only because of Benoit's several famous brands of high-grade Clothing and Furnishings, and of his exceptionally large stock, but also in consideration of the fact that a special ten per cent. discount is always given there on purchases made by U. of M. students.

In view of the above facts, any student not making Benoit his Clothier and Furnisher will be declared to be his own worst enemy, and must suffer accordingly.

Remember Benoit's address.

Benoit Clothing Co.

THE
ELECTRIC CITY
ENGRAVING
CO.
BUFFALO, N.Y.

THE UNIVERSITY OF MAINE, ORONO, MAINE.

The University is divided into Colleges, each offering several courses upon related subjects.

College of Arts and Sciences.

Elective Courses are offered leading to a Bachelor's degree.

Students may elect as their major subjects, Mathematics, English, Greek, Latin, Modern Languages, Physics, History, Civics, Biology.

Three years of work in any one subject constitutes a major. Minimum requirements in English, Science, Language, Mathematics. All other work elective.

The College of Agriculture.

The AGRICULTURAL Course, leading to the degree of B. S., is designed for those interested in practical and scientific agriculture, or those wishing to become teachers or investigators of agricultural science, or writers upon agricultural subjects.

SPECIAL Courses are offered in Agriculture, Horticulture and Dairying, for those who can spend but a short time in the University.

The AGRICULTURAL EXPERIMENT STATION is devoted to the scientific investigation of topics particularly related to the agricultural interests of Maine.

College of Engineering.

Each of the Engineering courses leads to the degree B. S.

The CIVIL ENGINEERING Course is designed for those who wish

to become surveyors, railroad, highway, hydraulic, bridge, or sanitary engineers.

The **MECHANICAL ENGINEERING Course** is designed for those who wish to become managers of manufacturing plants, or general mechanical engineers.

The **CHEMICAL Course** is designed for those who wish to become professional analysts, teachers of chemistry, or managers of industries in which an extensive knowledge of chemistry is needed. The degree given is B. S.

The **ELECTRICAL ENGINEERING Course** is designed for those who wish to fit themselves for any line of practical work in electricity.

The **MINING ENGINEERING Course** is designed to prepare for practical work in the investigation and development of the mineral resources of the country.

College of Pharmacy.

The **PHARMACY Course** is designed for those who wish a broad training, both general and technical, for the practice of Pharmacy.

The **SHORT COURSE in Pharmacy** is designed for those who wish the pharmacy course usually given in colleges of pharmacy.

College of Law.

The **COLLEGE OF LAW** is located at Bangor, and maintains a course of three years, leading to degree of L.L. B.

The **GYMNASIUM** offers the best opportunity for physical development. Athletic sports under proper conditions are encouraged. Military drill is required of all able bodied male students during a part of the course.

The students maintain a Glee Club, a Mandolin and Banjo Club, and a Military Band.

A student's necessary college expenses, including board, need not exceed \$200 a year.

For illustrated catalogue and circulars, address the President.

— Of Course there are

"Floral Occasions" —

—a decoration needed for the hall, a pretty design for some special event, or a dainty bouquet for "her." Those are the times when only the very choicest, freshest and best of flowers will answer — and when SEKENER should be at once thought of.

It's my sole business to satisfy every patron's floral want promptly and completely. My service is equally good on in-town or out-of-town orders. If you're rushed, telephone.

Adam Sekenger.

Conservatories : 32 Newbury St.,
BANGOR, ME.

BRANCHES AT—Sweet's, Bangor; Wyman's,
Brewer; Lowe's, Old Town.

WHO'S YOUR TAILOR?

If you are looking for a tailor who puts his whole time and skill into his work ; who does strictly high-grade tailoring and nothing else ; who is painstaking, careful and correct in all he does ; and who produces "the strictly proper thing" at a strictly moderate price— I'm yours to command.

I have tailored for hundreds of U. of M. boys, to their complete satisfaction ; Now I WOULD LIKE TO DO AS MUCH FOR YOU.

LYMAN B. CURRIER, 50 Main St., Bangor, Me.
(A Custom Tailor for 23 years.)
